Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Is.H 78 (LP 954)

l mddn bn zʿbrn

By Mddn son of Zʿbrn

Apparatus Criticus:
LP: reads zʿb bn at the end and takes the inscription as incomplete but in the commentary suggests that if the inscription is complete the name at the end might be read zʿbrn. JSafN p.101: reads zʿr rn at the end "he has cried out loudly". RyLPAdd p.350: zbrn for the last name.

Commentary:
The hammered dot read as ʿ is in a different technique to the other letters of the text and might with other hammered dots nearby be extraneous. There is sufficient room however between the z and b for another letter. The first b of the text is square and the second is rounded. There are traces of a scratched cartouche surrounding this inscription and H 79. It is possible that this should be identified with LP 954. See the commentary on K 171.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]

Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

l whbʾl ----ḥlm bn b{n}{ʾ}l w ḫrṣ f h lt s¹lm {w} {r}{w}{ḥ} {m-} {ḏ} {ḫ}{r}{ṣ}

By Whbʾl ----ḥlm bn {bnʾl} and he kept watch and O Lt [grant] security {and} {relief} {m-} {whoever} {keeps} {watch}

Commentary:
There is later hammering after the first name and room for three letters before the *ḥ* of the second name. The hammering also covers the bottom half of all the letters after the *m* of *s¹lm*. The former are scratched rather than incised on to the rock and are smaller than the rest of the letters of the text.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. l rbʾl bn ʿbd bn ʿlg bn ʾnʿm bn ʾs¹ bn ʾs²ym bn {h}ʾs¹d ---- [b]yt s¹hr mẓlm w f h lt nqmt

By Rbʾl son of ʿbd son of ʿlg son of ʾnʿm son of ʾs¹ son of ʾs²ym son of {hʾs¹d} ---- he spent the night awake having been wrongly treated [] and O Lt [grant] vengeance

Commentary:
The bottom part of the first letter of the seventh name is covered by later hammering and it is possible that it is an ʾ. The beginning of the narrative has been destroyed by a crude, recently hammered sign. The author has written two connectives, *w* and *f*, after the word *mẓlm*. There is a slight abrasion over the former and it is possible that he realised his mistake and made an attempt to erase it.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī

By ʾdm son of Flṭt son of Mrʾ

Commentary:
It is possible this text is LP 200 although the latter has the letters in a straight line. The text is surrounded by a cartouche with seven lines attached to it.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined

and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Is.H 208 (LP 515)

l ʿlg bn qṣy

By ʿlg son of Qṣy

Commentary:
LP implies that LP 515 occurs on a rock by itself but it seems likely that it is either the equivalence of this text or H 213 despite the fact that both of these texts occur on rocks with other inscriptions. As H 212 = LP 516 and H 214 = LP 217 it is possible that H 213 = LP 515 however the stance of the letters in LP's copy and in this text are the same and which perhaps makes this identification more probable.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]

---- rfʾt

Commentary:
H 228-231 which are all on the same face are extremely doubtful.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

By Mrʾ b

Commentary:
It is likely the text is unfinished.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

By ʾḏb son of ʾs¹lm

Commentary:
There is a more recent hammered sign of four lines joined by a horizontal one next to the inscription.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the

well and on the southern headland, on the crest of which is a stone tower.

Commentary:
There is a cartouche surrounding the inscription.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

l qdm bn ʿs¹y bn lḥyt

By Qdm son of ʿs¹y son of Lḥyt

Commentary:
H 422 is inscribed over the beginning of this text. The m has been hammered in and changed to the r of H 422. The other letters have all been tampered with. A shallow line has been scratched between the arms of the b a deeper line is inscribed across the circle of the ʿ and there are light scratches between the arms of the s¹. There is a shallow line attached to the y to form a prong and the n has been turned into a rectangle. The l has been changed into a ṣ the ḥ into a w by the addition of a line across the arms of the ḥ the following y has been turned into a ṯ by the addition of a circle and the t is surrounding by a circle. There is a cartouche surrounding the inscription with seven lines attached to it.

Provenance:

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined

and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined

and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Is.K 8 (LP 987 + 986)

l lḏn bn bġḍ {b}{n} ml bn ʿml

By Lḏn son of Bġḍ {son of} Ml son of ʿml

Apparatus Criticus:

LP: The first two names of the text are read in LP 987 and it seems likely that LP 986 is the last part of the text read in the opposite direction although LP's copy is written in a straight line without bn ʿml occuring at an angle to the rest. LP 986 is read l my bn gml. RyLPAdd p. 350 LP 986: ḥy for my. JSafN p.11 n.18: l my bn ʿml.

Commentary:
The third bn and fourth name are written at an angle after the ḍ of bġḍ rather than straight on from the second name where there would have been plenty of room. It is possible that the name ml is an error and the author realising that he had left out the ʿ wrote bn and the correct name at an angle to rectify his mistake.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

l {w}{d}{d} bn khl bn ʾs¹lm bn mrdy bn kwnt w h yṯʿ s¹lm

By {Wdd} son of Khl son of ʾs¹lm son of Mrdy son of Kwnt and O Yṯʿ [grant] security

Commentary:
The reading of the first name is doubtful as part of the Arabic inscription is inscribed across it. If the first letter of the name is a w then one line of the circle is thicker and more deeply inscribed than the other parts of the letter. If the third letter is a d then part of the line of the loop is very shallow and the rest is under a line of the Arabic inscription.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

It is possible the signs are a wasm.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

The letter read as ʾ has a fork at one end and three prongs at the end.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

By Mddn son of Zʿbrn

Apparatus Criticus:
LP 954: the copy is interpreted as being incomplete and the end is read as zʿb bn but in the commentary Littmann suggests that perhaps the name zʿbrn should be read. JSafN p.101: L mddn bn zʿr rn; translation of rn "He has cried loudly [here]. RyLPAdd p. 350: zbrn for zʿb bn.

Commentary:
The first two letters are direct hammered. The identification with LP 954 is not absolutely certain. It is

possible that H 78 should be identified with it instead of this text. Both K 171 and H 78 have a hooked lām auctoris whereas that in LP 954 is straight. However the z in K 171 is more like that in LP 954.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the

top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Is.K 275

l mty bn ʾs¹d ----

By Mty son of ʾs¹d ----

Commentary:
There are traces of letters after the second name.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0028165.html

Is.K 276 (LP 426)

l wqm bn s¹r bn ṣbḥ w rʿy h- ʾbl h- nḫl w wrd h- nmrt

By Wqm son of S¹r son of Ṣbḥ and he pastured the camels in the valley and watered [at] Nemarah

Apparatus Criticus:
LP: emmends the third letter to d and reads the altered bn as w which is translated as "and". The commentary suggests that the first two names might be read as one "wqmws¹m" "may he humble and poison" i.e. his enemies. wrd is translated as "he drew near". JVR p.33: emmends the second w in LP's copy to bn.

Commentary:
The first bn has been changed to a w by the addition of lines joining the n to the arms of the b and a crossbar see K 277. There is a second line inscribed along the curve of the first r which gives it the appearance of a m.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. ---

Is.K 277 (LP 427)

l ġrm bn ys^{1}ʿd bn ms^{2}ʿm w s^{1}lm <<>>> h {l}t m- s^{2}nʾ

By Ġrm son of Ys^{1}ʿd son of Ms^{2}ʿm and grant security O Lt from S^{2}nʾ

Apparatus Criticus:
LP: l rbʿm w ys^{1}ʿd w ms^{2}ʿm w s^{1}lm l- [h]m h/ [numerical sign for 3]t m- s^{2}nʾ "By Rbʿm and Ys^{1}ʿd and Ms^{2}ʿm. And protection be [granted] to them these three from the enemy!". HDic p.239: w s^{1}lm {h}m h (ʾ)l(t) m- s^{2}nʾ "And [grant] {them} security O {ʾlt} from enemies." JSafN p. 98: lb bn nwṣ ṣʿd w ms^{2}ʿm w s^{1}lm l- mḥdlt m- s^{2}nʾ "Lb son of Mwṣ. Felicity and reconciliation! And security to [any] troop of armed men from [any] enemy".

Commentary:
Associated drawing to be numbered. The bn's of the text have been changed to w's by the addition of lines which are clearly shallower than other lines of the text. l and m have been repeated after s^{1}lm. The line read as l in the deity's name is rather short and resembles a n. The n of the last word is attached to the s^2. There are light scratches over the end of the inscription.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Area A. The text is probably unfinished.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Is.L 24

l s¹wd bn ʿ<<>>yl

By S¹wd son of ʿyl

Commentary:
Area A. All the letters of the text are scratched except for the h which is scraped. Considering this difference of technique and the fact that the h is very close to the ʿ it is probable that it was inserted after ʿyl was written. The text is enclosed in a thinly scratched cartouche. After the end of the text outside the cartouche there are several scratched lines forming an unidentifiable drawing.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. Is.L 52

l ẓnnʾl bn ʾṣmʿn bn ṯḥwm

By Ẓnnʾl son of ʾṣmʿn son of Ṯḥwm

Apparatus Criticus:
LP 1073: ʾṣbʿn for ʾṣmʿn and {ʾs[1]}<<g>>lm for ṯḥwm.

Commentary:

Area A. One of the forks of the two ʾs is closed by carving a line between the branches of the fork thus forming a triangle. Despite this pecularity they are different from the ṣ which has a semi-circular (and not triangular) loop. It is possible that the ṯ of ṯḥwm is in fact an ʾ or even a ṣ with both loops closed but as the author has apparently tried to avoid confusion it is more likely to be a ṯ.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0026454.html

---

Is.L 53 (LP 1052)

l ḍhd bn kṯbt

By Ḍhd son of Kṯbt

Apparatus Criticus:
LP 1052: (g)lḥ for kṯbt

Commentary:
Area A. The identification is not entirely certain and it is possible that LP 1052 should be identified with L 83. However the d with its stem bent back and solid direct-hammered loop and the ṯ in which the loops are virtually invisible make this text the more likely candidate.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. l ʾs^{1}r bn ḫl bn ʾmr[[]] w h rḍw ġnmt m- s^{2}nʾ qrb

By ʾs^{1}r son of Ḫl son of ʾmʿẓ and O Rḍw [grant] booty from any enemy who approaches

Commentary:
Area A. There is a more lightly scratched line touching the r of ʾmr but it does not seem to be part of the text. See K 293 for the same genealogy + 1. The absence of definite article before s^{2}nʾ suggests that booty is requested from any enemy. Qrb has been taken as an active participle (cf. Arabic qārib) but it could equally be and adjective (cf. Arabic qar¡b) meaning "in the vicinity". Or qar¡ban ʿvery nearʾ (M & Mu)

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria

l grm'l bn ḏ'b bn kn w ws^{1}q -h h- s^{1}l b- r' {{h-}} gml s^{1}nt ws^{1}q 'l qdm 'l hrm f h lt s^{1}lm

By Grm'l son of Ḏ'b son of Kn and tuberculosis injured him at the year the 'l Qdm contended with the 'l Hrm and so O Lt [grant] security

Commentary:
Area A. It seems that the author initially wrote a b or a r instead of a y in b- r'y and then made a loop out of the angle of the of the b/r. The n and the t of s^{1}nt have been scratched over and rewritten (by the author?) just below the two letters. h- s^{1}l might be equivalent to Ar. sill = "tuberculosis".? However in view of the interpretation of b- r'y gml Littmann's interpretation from Ar. sayl = "flash-flood" is more appropriate. The phrase b- r'y gml also occurs at the end of SIJ 827 (not read by SIJ but visible on the photograph) in the sentence w ṣyr m- mdbr b- r'y gml. Littmann's suggestion that it was a place name meaning literally "a [not "the" as in LP p. 117] watering-place of camels" with r'y being from the root rwy and meaning "watering place" is accepted faute de mieux. Indeed this would fit most of the other instances of r'y as well. See also Photo Misc PH 20 for the part of the text from kn to b- r'.

Provenance:

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

l ẓn'l bn ʿlm bn grm'l bn ḏ'b bn {k}{n}

By Ẓn'l son of ʿlm son of Grm'l son of Ḏ'b son of {Kn}

Apparatus Criticus:
LP 430: bll for {kn}.

Commentary:
Area A. The stem of the second letter of ẓn'l is not as long as it appears at first glance. It was extended up in alignment with it and a more thinly scratched line running round the ẓ was then drawn to join it with the lām auctoris. The very thinly scratched line which crosses the g is extraneous. The third prong of the ḏ is joined to the previous letter. The reading of the last two/three letters is not completely certain: it is possible that the join between the curving part of the k and the vertical stem which follows is accidental (it continues beyond the vertical line and touches the last letter). Five m of various sizes have been incised on the same face of the stone four of them partly or completely covering the text.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria

Is.L 129

l ʾmr bn ḥmyn w l- ġḍr mn- {s²}nʾ

By ʾmr son of Ḥmyn and he shall not be found wanting in the face of {enemies}

Apparatus Criticus:
LP 475: w nġḍb mn bn<h> for w l ġḍr mn- {s²}nʾ

Commentary:
Area A. The text is written on the ridge between two faces of the stone. LP's reading is impossible. The letter before ġḍr is too long for a n (see previous n). The s² has no zig-zags. The b and the ḥ are 90°. We have taken the l following the w as representing the negative particle lā appearing here for the first time in Safaitic which in Arabic is used with the perfect in assertions when an occurrence is considered "so certain that it may be described as having already taken place" [Wright ii 2A]. The asseverative quality of the statement has been represented in our translation by the use of the auxilliary "shall". Ġḍr would be equivalent to Ar. ġaḍḍara "he fell short of what was requisite he was cowardly" [Lane 2266b] with mn in the sense of "as regards to" hence "in the face of". Alternatively it could be the equivalent of ġaḍara/ ġaḍira "to turn aside" though in Arabic this takes ʿan rather than mn [Lane 2266a]. However if the l after the w is taken as a second lām auctoris introducing a second author cf. L 284. But then the rest of the text is incomprehensible. ġḍr could = Ar. ġaḍar ʿprosperity'

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria

By ʾb son of Ms^{1}k

Commentary:
Area A.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Is.L 137

l z{l}ʾl bn whbʾl

By Zlʾl son of Whbʾl

Apparatus Criticus:
LP 478: s¹ʾl for z{l}ʾl. LP 946: z(d)ʾl for zlʾl; whb(ʾl) corrected from whbḍ on the copy

Commentary:
Area A. The second l is as long as the lām auctoris whereas the n is much smaller. The reading of whbʾl implies that the vertical stroke attached to the ʾ does not belong to the letter. It is also possible that the author wrote this stroke as the final l but that finding it confusing he traced a second one above and at right angles to the letters wh. The identification of this text with LP 946 is certain the copyist taking the ʾ and the line attached to it as a ḍ. He also copied L 130 [= LP 945] which Littmann had missed. It is not clear why this copyist chose only these relatively insignificant texts from among the 11 on this rock.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]

l {f}zl

By {Fzl}

Commentary:
Area A. The second letter could also be a s^2. L 160-167 are enclosed into a direct hammered cartouche.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Commentary:
Area A.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Is.L 319

h rḍw hb l- qdm nqmt mn ’s^{1}d ’bl -h

O Rḍw grant Qdm vengeance on ’s^{1}d [for or in the form of] his camels

Commentary:
Area B. The m in mn is 90°. The b of ’bl has been partly hammered over giving it the appearance of a k and a short stroke has been added to the hook of the l in the same word. This inscription must have been written before 315 since that text is forced to swerve to the left to avoid the final -h of 319. The reading seems clear but it produces an apparantly awkward construction.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

l dḫr bn ʾhwd bn ḥy

By Dḫr son of ʾhwd son of Ḥy

Apparatus Criticus:
LP 939: dḫ{l}(t) for dḫr.

Commentary:
The "short stroke" which Littmann converted into a t is in fact the continuation of the longer stroke which he took as a l. There is a small dip in the surface which can put into shadow the join between them. The apparent continuation of the lower line beyond the join is in fact part of the crack in the rock which runs from the upper fork of the ḫ across the r and then back across the lower fork of the ḫ. Although not shown on the copy in LP the cross-bar of the y of ḥy is clear in this text though obscured by a chip in M 30.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Is.M 42

l grmʾl bn bhm bn ʾlwhb bn ʾs^{1}wd

By Grmʾl son of Bhm son of ʾlwhb son of ʾs^{1}wd

Commentary:
The first two names are chiselled and the last two lightly incised. The identification of this text with LP 936 and 937 cannot be completely certain given the crudeness of the copies made by Littmann's companions. But the fact that LP 936 and 937 contain the genealogies in the two halves of M 42 suggests that it is very probable. On the other hand the copies of LP 936 and 937 do not read boustrophedon at least in the form in which they are published.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]

l ʾlwhb bn ʿzz bn yzʿm

By ʾlwhb son of ʿzz son of Yzʿm

Commentary:
The text was carved in a number of techniques. The first two letters were direct hammered and the lower hook of the ʾ was then extended by incising with a broad point. The next three letters lwh were incised with the same broad point and the left side and cross-bar of the w are formed by less careful multiple incisions. The b of the first name is direct hammered but the bn which immediately follows it is formed by multiple incised lines. The ʿ of the second name is shallowly incised with a narrow point. The first z was incised with a broad point. The stem of the second seems to have been formed first by a a very finer point and then incised with a different broad point (or the same point held at a different angle). The cross-stroke of the second z is direct hammered. The b of the next bn is formed by multiple scratches and the n by one such scratch reinforced by a line incised with a broad point. The final name is lightly incised with a fine point.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]

Is.M 60

l ʾnʿm bn ʾs¹wd

By ʾnʿm son of ʾs¹wd

Commentary:
Given that the inscription consists of only two common names it is difficult to identify M 60 with LSI 111 (= C 3249) or LP 960 with any certainty. It cannot be LP 486 since this is securely identified with L 28 and LP 960 could equally well be H 195. CHECK IF M 60 IS ON THE "SOUTH SIDE OF THE HILL" THE PROVENANCE GIVEN FOR LSI 111. Some of the letters (e.g. the ʾ-s^1-w of the second name) are lightly incised. The rest appear to have been formed by scraping the surface with a relatively narrow transverse point. On the other hand (and perhaps more likely) this effect may be the result of variations in the pressure with which the instrument was applied to to the surface since both techniques can be observed in the d.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

l ḍhd bn ṯbr h- bkrt

By {Ḍhd} son of Ṯbr is the young she-camel

Apparatus Criticus:
LP 934: Nbl for ṯbr; h-bkrt omitted

Commentary:
M 64 65 and 66 can be identified LP 934 933 and 932 with more by the lay-out and mutual proximity of the latter than the texts. The published versions of these inscriptions show how inaccurate some of the copies made by Littmann's companions could be. The lower edge of the face laminated at a period before the inscriptions were carved and the final letters of all three texts are written in this more lightly patinated area. The last three letters of M 64 are very faint but just visible on the slide. Associated drawing to be numbered.

Is.M 72

l lṯmt bn ḫfy bn rbn <<>>bn bny w wgm ʿl- bny

By Lṯmt son of Ḫfy son of Rbn son of Bny and he grieved for Bny

Apparatus Criticus:
LP 322: lʿṯmn for lṯmt; [b][n] ḥbn bn ʿly w wgm for <<>>bn bny w wgm ʿl bny

Commentary:
There is a small curving line joining the second and third letters part of which Littmann copied and read this as a ʿ. However compare the ʿ of ʿl- which is a full circle. The fifth letter which Littmann read as n has a clear cross-stroke and can only be n. After rbn the text turns sharply back on itself. To the right of the bn which follows rbn there is a ḥ in exactly the same technique as the other letters but which is curiously placed if it was intended to be read as part of the text. Moreover to take it as the first letter of the next name (ḥbn) as read by Littmann not only requires the restoration of a [b][n] between rbn and the ḥ but also an unnatural reading of the letters which follow (Littmann's ʿly where the sequence of letters would at best be lʿy or yʿl). It therefore seems more likely that the ḥ is extraneous to the text (though see below for another suggestion). If this is accepted the text then reads easily rbn bn bny w wgm ʿl-. Despite the fact that there is plenty of room on the face the statement has been written in a tight circle which places the ʿl- immediately above the final name of the genealogy bny. The obvious conclusion is that the author was grieving for bny and by an elegant device made it clear that the bny for whom he was grieving was his great grandfather. Given that the author did this at the end of the text it just possible that the ḥ discussed above is part of an even more elaborate device. If the name ḥbn did indeed occur in the author's geneaology between rbn and bny it is just possible that he "telescoped" the five b-n sequences in the three successive names and the two "ibn"'s which separated them making the b-n sequences of rbn and ḥbn do duty also for the following ibn's. However this is a far more speculative hypothesis than the reading proposed above and is not supported by the genealogies in M 85.1 and 85. 2 which appear to be by brothers of the present author. It would seem therefore that the ḥ must be treated as extraneous to the text. Ḥbn would be so far unattested in Safaitic since the references in HIn p. 175 should be deleted. The name in SIJ 550 is clearly ḥrn (which should be added to HIn. 186) and in WH 3685 ḥbn appears to be a substantive.

Provenance:

l {k}s^{1}m

By {Ks^{1}m}

Commentary:
The text is lightly scratched between the ketters of the first name of M 89. The m is crossed by a number of parallel lines.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

[Latitude/Longitude: 32.89645 / 37.31101]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

l mṭr bn ḥmlt bn ḫr bn ḥmlt w wgʾ

By Mṭr son of Ḥmlt son of Ḫr son of Ḥmlt and he gelded

Commentary:
The surface of the stone is rough and covered with tiny pittings. The l's of the second and fourth names are the same length as the n's and significantly shorter than the lām auctoris. However in M 99 the name of the two authors' common great-grandfather is clearly ḥmlt. The verb wgʾ has not be found before in Safaitic. Ar. waÏaʾa is used of gelding goats and it is possible that it could be used with the direct object understood just as the verb wld which is usually found with h- mʿzy as its direct object can sometimes be found alone (e.g. NSR 10 WH 1114).

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria

----lb bn ʿt bn mrʾ w wgd s¹fr ḫl -h ms¹k f bʾs¹ mẓll w {wg}{m} ʿl- ʾb -h w ʿl- dd -h s¹k

---- lb son of ʿt son of Mrʾ and he found the writing of his maternal uncle Ms¹k and so was overshadowed with grief {he grieved} {for} his father and for his paternal uncle S¹k

Commentary:
The first three visible letters are written very close together and an abrasion half way down their stems gives the impression that they are joined i.e. that they are one letter ṭ. The text appears to begin on the adjacent face but the letters there are too faint to be read. The author appears to have omitted a connective after mẓll as well as the g-m of wgm and the l of the following ʿl- and added them above the line. However none of these interpolations is clear. The g if that is what it is is considerably smaller than the ʿ's of the two ʿl's. The m if that is what it is has a cross-bar which makes it look like a w. The l is crossed by a stray diagonal scratch giving it the appearance of a tiny ḫ. Finally there is an extraneous more recent triangular mark just above the ʾ of ʾb -h. The ʿ of the ʿl- is the same size as and a similar shape to the m of wgm as is that of the second ʿl-. While the name s¹k is attested in Safaitic it is possible that the author also omitted a m at the beginning of this name.

Provenance:

Is.M 106 (LP 424)

l mlk bn ġyrʾl bn nhb w nẓr s¹nt ngy mlk s¹lṭn

By Mlk son of Ġyrʾl son of Nhb and he kept watch the year that Mlk retained power

Apparatus Criticus:
LP 424: mn h- s¹lṭn for mlk s¹lṭn

Commentary:
The letters are entirely clear and Littmann's reading is impossible. The interpretation of the dating formula is difficult. The simplest translation "the year that Mlk rescued s¹lṭn" is unfortunately unlikely since the use

of of the term sulṭān as a personal name is not attested until late in the Islamic period. On the other hand s^1lṭn meaning "imperium" in Safaitic is defined in all other examples except one C 66 where the copy has s^1nt ngy ----m s^1lṭn in which the m is probably the preposition meaning "from" but could be the end of the previous word the rest of which is lost in which case it would provide an exact parallel to our text but would be of no help in elucidating it. In all other cases s^1lṭn is defined and when following the verb ngy it is preceded by the preposition m(n)- (e.g. LP 540 s^1nt ngy m- nmrt h- s^1lṭn). In Arabic and apparently in Safaitic the verb ngy in the I Form means "to be rescued/escape from (mn-) something" and the II Form means "to rescue (someone) from (mn-) something/someone". We would suggest very tentatively that here ngy mlk means "Mlk was saved" and that s^1lṭn is an adverbial accusative (equivalent to Arabic sulṭānan) "as regards political power". In this case mlk must be a personal name since if it represented the title "king" it would have to be defined. Given that s^1lṭn seems to be used of state rather than individual power and the fact that the only rulers in the region who we know used the personal name Mlk were the Nabataean kings it is probable that this text refers to one of the Nabataean monarchs of this name either Malichos I (c. 58-30 BC) or Malichos II (AD 40/41-70/71). Malichos II's name was in fact written Mnkw in Nabataean a form which appears in Safaitic in the forms Mk and ʿbd-mk. It is therefore possible that this text refers to one of several known incidents in the reign of Malichos I or one of others unknown. One possibility is the war between Herod the Great and Malichos I in 32/31 BC the final battle of which took place near Qanawāt. According to Josephus Herod at first beat the Nabataeans but the latter were saved at the last minute by Cleopatra's general Athenion who attacked and routed the Jewish army just as it was celebrating victory. Josephus notes that the latter "received a great loss in places where the horses could not be of any service and which were very stony and where those that attacked them were better aquainted with the places than they themselves" (AJ v.1.). Josephus comments "the Arabians [i.e. Nabataeans] had unexpectedly a most glorious success having gained that victory which of themselves they were in no way likely to have gained" (ibid.). On the other hand he gives no indication that loss of this battle would have resulted in the removal of Malichos from power.

l ms^{1}k bn ʾbrqn b[n] {m}{s^1}k w rʿy h- ḍʾn s^{1}nt s^{1}rt mlk b- h- ʿrḍ f h lt s^{1}lm

By Ms^{1}k son of ʾbrqn son of {Ms^{1}k} and he pastured the sheep the year Mlk served in the great army and so O Lt [grant] security

Apparatus Criticus:
LP 326: s^{1}nt s^{1}r (h-) mlk b- h- ʿrḍ "the year in which the king travelled in this valley (?)".

Commentary:
The inscription was carved after the the drawing and M 112 which it carefully avoids. The s^1 of the third name is attached to the y of yʿwr in M 112 and the letter(s?) before it is/are damaged by abrasions. The word after s^{1}nt is clearly s^{1}rt (on both the original and Littmann's copy) and LP's reading s^{1}r h- mlk is therefore impossible. For our interpretation see MISS p. 468. The last three letters are scratched.

By Mty son of Bʿr son of Mty son of Bʿr son of Ḥbb son of S²nʾ

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

l ns^{2}ʿʾl bn s^{1}wr bn s^{2}dy w wgʿ ʿl- bny ʾḫt -h f m{k}{m} h- ʾʾlht

By Ns^{2}ʿʾl son of S^{1}wr son of S^{2}dy and he was sorrowful for the little son of his sister and so ---- the gods

Commentary:
Bny could represent either the diminutive (cf. Ar. bunayy) or the oblique case of the plural (cf. Ar. ban¡). The latter would however require the assumption that what is a final long vowel in Arabic was a pronounced as a consonant in Safaitic. The is the first occurrence in Safaitic of the plural of ʾlh "deity" cf. Ar āliha. The preceding h could be either the vocative particle or the definite article depending on the interpretation of the preceding word the second and third letters of which are obscured by an abrasion (see SEMB96 22:22 for best view of this passage).

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria

l ʿqrb bn mlk bn {w}{h}blh w wgm ʿl- ʾb -h w h dṯn h- s¹fr

By ʿqrb son of Mlk son of {Whblh} and he grieved for his father and O Dṯn [protect?] the writing

Apparatus Criticus:
LP 341: w (ḥ)dt h- s¹fr "and he made this new inscription" for w h dṯn h- s¹fr

Commentary:
The initial letter of the first name and the first two letters of the third name have been have been damaged by heavy over-hammering but are still visible. The ʿ of ʿqrb is a circle not a "dot" as suggested by Littmann. The invocation is absolutely clear on the stone and what Littmann considered to be a "flaw in the stone" following the ṯ is in fact a n. Thus the prayer is address to the deity Dṯn found in other texts at al-ʿÛsāw¡. Whether the verb has been omitted or is to be understood or the prayer is simply calling the deity's attention to the inscription is inclear.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria

[Latitude/Longitude: 32.903569 / 37.320314]

Is.M 135

l ʾ{s¹} bn wʾl bn s²hyt bn s¹ny w wgm {ʿ}l- ʾḫw -h ʿl- ḥn w ʿl- ʿrm

By {ʾs¹} son of Wʾl son of S²hyt son of S¹ny and he grieved {for} his two brothers for Ḥn and for {ʿrm}

Apparatus Criticus:
LP 386: ʾḫ for ʾ{s¹}; ʿmr for ʿrm. LP 1101: s²hy(t) for s²hyt; w[g][m] for wgm; ʿl for {ʿ}l; ʾḫ(h) (w) for ʾḫw -h; ʿm for ʿrm

Commentary:
The text was incised with a broad point. The third letter could be ḫ or s¹ but its size in relation to the previous ʾ and compared to the ḫ later in the text suggests that it is more likely to be s¹. From the position of the ʿ-r of the final name it would seem that the author originally omitted them and then inserted them below the line. Littmann's reading ʿmr is less probable since the r is placed before the m. As Littmann notes this

text shows clearly that the dual of ʾḫ in annexation is ʾḫw. Littmann did recognize the identity of LP 386 and 1101 and his reading ʾḫ -h w was based on the assumption that the order of w and had been inadvertently reversed by the author or the copyist.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]

By Bʿr son of S²mt son of Bʿr son of Gdy

Commentary:
By a son of the author of M 141. Note that in LP M 142 and 143 have been widely separated from M 140 and 141 even though they are on the same stone. The text begins on the ridge between two faces and runs onto the face bearing M 143 and the end of M 141. The second half of the text has been damaged by abrasions but is still legible. Note that the abrasion which runs across the g give its the appearance of a ṯ on the photograph but its original shape is still clearly discernible on the stone.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

l ḫlf bn bʿr bn zbd'l bn s²mt w dṯ' h- ʿrḍ f h lt s¹lm m- b's¹ w mn- ḥlt

By Ḫlf son of Bʿr son of Zbd'l son of S²mt and he spent the season of the later rains in this valley and so O Lt [grant] security from misfortune and from an attack

Apparatus Criticus:
LP 374: mn ḥlt "from cunning" for mn ḥlt "from an attack"

Commentary:
See the commentary to M 142. The final phrase was read m- h/ s¹nt on the original and this would presumably mean "from this drought" (cf. Lane 1448a-b). While the expressions s¹lm (or rwḥ ġnmt etc.) h/ s¹nt (meaning "this year") often appear in prayers s¹lm m- h/s¹nt would be unique the nearest comparison being h lt s¹lm w ḫlṣt m- s¹nt b's¹ in WH 2110. However on the photographs it is clear that what was taken as the side-stroke of the h is not joined to the stem and that Littmann's reading mn- ḥlt is equally possible. His translation however seems most unlikely and we would propose "from an attack" based on ḥallah (pronounced ḥalli) "attack" (Landberg Glossaire de la Langue des Bédouins ʿAnazeh p. 13) possibly related to ḥ¡la or ḥawla "strength might force" (Lane 675c 688c)?

l s¹ny bn s¹ḫr bn ʿbd bn ʾdm bn ms¹k w wgm ʿl- hq[[]]wm w ʿ<l>- ḥmlt w ʿl- ----

By S¹ny son of S¹ḫr son of ʿbd son of ʾdm son of Ms¹k and he grieved for hq[[]]wm and for Ḥmlt and for ----

Apparatus Criticus:
LP 356: (ʾ)qwm for hqw[[]]m; w [ʿ][l-] ʿln ---- for w ʿl- ----

Commentary:
Although he copied M 144 and 147 Littmann seems to have ignored all the other inscriptions on this stone (i.e. M 145-146 148-151). Unlike the rest of the text which is incised the letters of the second name are scratched and Littmann apparently did not see and therefore did not copy the r which is particularly faint. He therefore suggested that the ḫ was a monogram of ḫ and r. In fact the r is larger even than the ḫ and forms a link between the first two lines of the text. Littmann regarded hqwm as an error for ʾqwm citing w wgm ʿl- ʾqwm in LP 410 and ʿl ʾq[w] m in 411 to which one might add w wgm ʿl ḥmlt w ʾqʾm in M 150 (on the same stone as this text) but there is nothing to indicate that the same person is referred to in all four texts. However the author did make two errors. He wrote the q of hqwm twice making a feeble attempt to erase the second. He also wrote h for l in the second ʿl-. The final name is very faintly scratched and is illegible.

l dʾf bn s¹ḫr bn ʿbd bn ʾdm bn ms¹k bn s²rb bn ġlmt w bdʾ h- ḫrf f h lt s¹lm w rʿy h- ḍʾn

By Dʾf son of S¹ḫr son of ʿbd son of ʾdm son of Ms¹k son of S²rb son of Ġlmt and the first rains began and so O Lt [grant] security and he pastured the sheep

Apparatus Criticus:
LP 355: w(b)(ʿ)(d) (-h) h- ḫrf "and the autumnal rain drove him away" for w bdʾ h- ḫrf

Commentary:
Associated drawings to be numbered. Littmann's copy joined parts of three letters from M 148 (the rest of which he did not record) to the tops of the b-d-ʾ of bdʾ. The verb bdʾ "to begin" has not been found before in Safaitic. On the meaning of ḫrf in this text see MST p. 4. Among the modern bedouin ḫar¡f is the end of the dry season qyẓ and ends with the rains which coincide with the rising of Canopus (Suhayl). These rains are called Sheylāwi or ḫerfi and belong to those called by the bedouins al-wasm which are the most important of the year for the replenishment of wells and the growth of pasture (Musil Rwala p. 5 8 13). It is possible that the prayer for security was occasioned by the fact tha raiding was common in times of rab¡ʿ that is the abundant herbage produced by rains at any season (Musil Rwala p. 13-14 and 507).

Provenance:

l {l}{y}{s¹} bn bny bn s¹ḫr bn ʿbd w byt h- dr w ʿlf h- mrbʿt ʿl- h- nmrt w ṣlf mʿ{z}y {-h} ---- y{z}ʾ{z}s¹mr----

By {Lys¹} son of Bny son of S¹ḫr son of ʿbd and he spent the night here and he fed on dry fodder the camels born [or who had given birth] at al-Namāra in a time of abundance and {his} {goats} {failed to multiply} ----

Commentary:
The reading of the first name is very difficult and lys¹ is suggested very tentatively. The first two letters touch each other and the "s¹" which is made up of one straight and one curving line could be a k. The sign immediately following the s¹ may be the last letter of the text. Neither lys¹ nor lyk are attested but cf. perhaps Ar. lays "courage" or lāka "to chew" (?). Littmann copied part of the f of ʿlf and part of the following h and the m of mrbʿt as belonging to letters in LP 355 (M 147). The word mrbʿt recurs in LP 357 where Littmann took it as representing the fem. pl. of the active participle of the IV Form of rbʿ murbiʿāt (Vocabulary p. 342b) and translated it "spring camels" without explaining quite what he meant by this. As Musil explains "in the inner desert the word rab¡ʿ does not signify a season of the year" but the abundance following good rains at any season "it is therefore impossible to translate it by the word spring as we may when we are dealing with the settled and cultivated territories. The fellẓhḤn inhabitants of the cultivated territories enjoy the rabḤʿ from year to year and as it always begins at the same season the rabḤʿ for them signifies the spring" (Rwala p. 13-14). According to Lane (p. 1017b-c) rubaʿ signifies "a young camel brought forth in season called rab¡ʿ" (of which the fem. pl. is rubaʿāt) though Musil says that the Rwala give this name to a she-camel in her sixth year which is when she may first be covered by the male (Rwala p. 333). Lane (p. 1020a-b) says that murbiʿ (without tāʾ marbºṭa) or mirbāʿ is "applied to a she camel that brings forth in the

season called rab¡ʿ or that has her young with her the young one being called rubaʿ." From this it would seem that no appropriate exact parallel to mrbʿt is provided by the Arabic lexica which probably explains Littmann's choice of the ambiguous "spring camels" but that the translations offered above are pronbaly not too far from the mark. The author appears to have omitted the f of ṣlf and to have added it to the side of the text. In Ar. the verb ṣlf is used of things which do not live up to expectations (clouds which give little or no rain seed that does not produce much growth etc.).If the following word is mʿzy the z is imperfectly formed. The -h is followed by two crossed lines more lightly incised than the rest of the text and which may not belong to it. I can make no sense of the rest of the text.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria

l s²mt bn zḥk bn mʿz bn ms²ʿr w {w}gd s¹fr ʿḏ f ngʿ {w} wgm ʿl- ymlk w ʿl- zḥk w ʿl- mʿz w ʿl- ʿbd w ʿl- ns¹ʾ f wny f wlh ʿl- gs² -h l- ʾbd f h lt w ḏs²r w s²ʿhqm s¹lm l- ḏ s¹ʾr

By S²mt son of Zḥk son of Mʿz son of Ms²ʿr and he {found} the writing of ʿḏ and so he was sad {and} he grieved for Ymlk and for Zḥk and for Mʿz and for ʿbd and for Ns¹ʾ and so he was depressed and will be distraught with grief for ever on account of his raiding party and so O Lt and Ḏs²r and S²ʿ-h-qm [grant] security to him who leaves intact [or who remains]

Commentary:
The text is written across two faces. The w of wgd is under a patch of abrasion as is the w before wgm. The f before wlh seems to carry on the sequential sense of the previous f and I have therefore translated it simply as "and" rather than "and so". I have taken the sense of the perfect in wlh l- ʾbd to be that of "an act the occurrence of which is so certain that it may be described as having already taken place" (Wright ii 2A) since "he was distraught with grief for ever" makes little sense. It is possible that the five persons for whom he wgm were members of his gs². The author's grief for his raiding party suggests that its members had perished and that only he (or perhaps he and a few others) had survived possibly because they had been left behind with the baggage and exhausted camels (Musil Rwala p. 523). In this case the prayer s¹lm l- ḏ s¹ʾr might refer to the author "the one who is left" rather than as is usually the case to "whoever leaves [the inscription] unharmed".

l {ṯ}mm bn ḥddn bn ḥddn ḏ- ʾl dʾf w wld h- mʿzy s¹nt ʾty h- qṣ f h lt brʾ l- h- ns¹

By {Ṯmm} son of Ḥddn son of Ḥddn of the lineage of Dʾf and he helped the goats give birth the year that the [disease] qṣ came and so O Lt [grant] healing to the people

Commentary:
The expression w ʾty h- qṣ is unattested and in view of the prayer for healing it probably refers to an epidemic disease. Qṣ might represent Greek kausos which Liddell and Scott (p. 932a)identify as "causus i.e. bilious remittent fever (the endemic fever of the Levant)." However this is not entirely satisfactory for kausos is a true Greek word (from kaiœ "to burn") and it seems unlikely that an endemic fever would be called by a Greek name in a Safaitic inscription.

[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Commentary:
This is the translation suggested by MCAM in 'References to S¡ʿ in the Safaitic inscriptions' (in J.-M.Dentzer: S¡ʿ). For ṣlf see NA Dict. Ml cf K 196 f h bʿls¹mn mwl h- ʾrḍ s¹rʿ. This suggests that the verb mwl has something to do with 'watering' or 'fertilizing'. In Classical Arabic the word aṣnām is used of minor deities not just of their images (see MCAM's Polytheism and Monotheism) See Milik in Hawran II on introduction of deities to S¡ʿ.

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

l ḥmd bn ṯbr bn ḫld {b}[n] bhl bn s²hr bn qms²t

By Ḥmd son of Ṯbr son of Ḫld {son of} Bhl son of S²hr son of Qms²t

Apparatus Criticus:
LP 493: bn for {b}{n}

Commentary:
Area H. The first 3 names are written in the 90° script. The sign(s) immediately after ḫld is on the cusp between the 90° and normal parts of the text and is obscured by later hammering. It appears to have been written as a 90° b and the following n omitted though it could be interpreted as a normal b with the n joined to the upper stroke. The h and r of s²hr are incised and the m s² and one stroke of the t of qms²t are scratched as is the "circle" of the q.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]

Is.Mu 4 (LP 490)

l hḥg{y} bn ḥgn

By {Hḥgy} son of Ḥgn

Apparatus Criticus:
LP 490: ḥgl for ḥgn

Commentary:
Area H. The upper part of the y is direct hammered and of a lighter patina than the rest of the text suggesting that it may have been added to a n. The n of bn is a long straight line whereas the lām auctoris has a hook. The final letter must therefore be n. The same distinction is present in WH 497 where the reading ḥgl should be corrected to ḥgn. The text is enclosed in a lightly scratched cartouche. See also colour print Misc PH 19

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]

Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

l gmr b ʿ<<>>l b s²mt

By Gmr son of {ʿl} son of S²mt

Commentary:
Area H. This author was almost certainly responsible for Mu 32 as well and in both texts wrote b for bn. For other possible examples see WH 2529 2538 etc. He appears to have been unsatisfied with both texts since Mu 32 was left unfinished and Mu 33 was scratched over. He seems to have been an inexperienced carver since the shallower lines projecting from the the r and ʿ in Mu 32 (and possibly that across the r in Mu 33) suggest that his instrument slipped and if our interpretation is correct he repeated the ʿ of the patronym in Mu 33.

Provenance:

Al-ʿĪsāwī, Rif Dimašq, Syria

Apparatus Criticus:
LP 344: gll for mlk; ʿḏ for ʿḏr; [w] for {w}; h- ḍʾn for h- [[]] ḍʾn; [ḫ]ym for kym

Commentary:
Area H. There are a number of unusual letter-forms and signs of carelessnes in this inscription. The fourth and fifth letters are obscured by over-hammering. The ʿ of ʿḏr is a small inverted triangle. There is a patch of hammerting immediately above it and it is possible that it was originally written as w. It appears that the author originally omitted the r of ʿḏr but later adapted the preceding ḏ to form a monogram ḏr(compare the ḏ of l-ḏ dʿy). The w which follows looks as though it was orinally written as "ġ" (?) to judge from the stroke projecting from the base of the w and those which can be made out beneath the rubbed area above it. A letter (possibly m) has been rubbed over between h and ḍʾn. A h has been omitted before s¹fr and a w after it. The reading kym is clear but its meaning is obscure.

Provenance:

By Mnʾl son of ʾws¹ʾl son of S¹ḫr son of Ḥml and he found the inscription of Mnʾl and the inscription of Tmʾl and the inscription of S¹ḫr who were lost and so O Lt [grant] security to him who remains and [take] revenge on him who killed and he grieved for ʾs¹ and for wdʿgrl who were lost and O Bʿls¹mn blind whoever scratches out the inscription

Apparatus Criticus:
LP 305: {h-} ḍlln for [[]] ḍlln; wdʿ w kl for wdʿgrl

Commentary:
Area H. The author wrote a h before ḍlln and then scratched it over converting it from an adjective to a relative clause. In addition he at first continued writing bʿls¹mn on the same face as the rest of the text but then realising that he had insufficient space scratched over the letters ls¹mn and continued on the adjacent face. At the end of the text he wrote the fr of s¹fr rather carelessly and then rewrote them more carefully. Despite the fact that his copy has wdʿgrl LP reads wdʿ w kl. This caused him to mistake ḍlly for a plural (see his commentary and LP p. xix) whereas it is in fact a dual of the passive participle referring to the two names which precede it. Ḍlln is the plural following the names of the three individuals whose inscriptions the author had found. The name wdʿgrl has not been found before. See also Photo Misc PH 28. w ʿl- edʿ gr -h ḍlly (M & Mu)

Stray letters on a face adjacent to LP 422 (= Is.Mu 52).

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī al-Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. This is Site G in Macdonald, Al-Muʾazzin & Nehmé 1996.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

By ʾs^1 {son of} ʾs^{1}d son of Rbʾl son of ʾnʿm son of Ms^{1}k son of S^{2}kr son of Ġlmt son of ʿbd and {he came to a watering place} in an area of abundant herbage and remained ---- and the winter brought no rain the year Wdn fled from {Rmn}----? and so O Bʿls^{1}mn [grant] relief from distress and uncertainty

Apparatus Criticus:
LP 406: wrd h-nmr(t) w ẖws^1 ʾbl [ʾ][ṯ]r ḏ w wṣl f h- s^{2}ty for wr{d} {b-} {h-} mrbʿt w s^{1}ʾr ----r {ḏ}g w ṣlf h- s^{2}ty;

Commentary:
Area G. The strange arrangement of Littmann's copy suggesting large gaps between sections of the text is difficult to explain. As can be seen from the photograph and the tracing there are no such gaps on the stone. The inscription runs along the edge of one face of the stone crosses over onto another at the word mrbʿt and then doubles back onto the first face at the word rm{n}. It must have been written after Mu 89 and 90 since it is squeezed into the spaces left by them on this face. Littmann did not record the last 16 letters which are scratched down the edge of this face opposite the first part of the text. The n of the first bn is obscured by the end of an abrasion which crosses the previous four letters. The upper parts of the d-b-h of wr{d} {b-} {h-} mrbʿt had already been destroyed by a chip when Littmann copied the text. The three letters after s^{1}ʾr are damaged by another abrasion and could be respectively l/h/y; ʾ/ṣ/h; ʾ/ṣ/ṯ/ḥ/y. The third side-stroke of the {ḏ} is lightly scratched and not joined to the stem and could be accidental making the letter a h. The author makes no distinction between b and r except in mrbʿt so it is not certain whether bmn or rmn should be read in the s^{1}nt clause. The abrasion after rm probably covers only one letter of which the ends protrude on either side. Other abrasions obscure part of the {y} and the whole of the {h} which follow. mrbʿt: cf. Ar. murbiʿa ʿabounding with the herbage called rabiʿ [of land]ʾ (Lane 1020a) See also Photo Misc PH 24. wr{d} ʿl- mrbʿt (M & Mu)

By ʿm son of Ḥn son of Ḥnn son of S²hyt son of S¹ny son of Ks¹ṭ son of ʿbdhm son of {Mms²y} and {he journeyed quickly} and he was on the look out for Mlk until this time. So, O Lt and Rḍy [grant] security

Apparatus Criticus:
l ʿm bn ḥn bn ḥnn bn s²hyt bn s¹ny bn ks¹ṭ bn ʿbdhm bn mms²(y) (w) (m)(ṭ)(y) w ḫrṣ mlkt ʾl- h ʿhd f h ylt w rḍy s¹lm

By ʿm son of Ḥn son of Ḥnn son of S^{2}hyt son of S^{1}ny son of Ks^{1}ṭ son of ʿbdhm son of {Mms^{2}y} and {he journeyed quickly} and he was on the look out for Mlk until this time. So, O Lt and Rḍy [grant] security

Commentary:
The part of the text between *ʿbd-hm* and *w ḫrṣ* has been tampered with: letters have been joined and lines extended to give the impression of a series of *m*'s (however compare the shape of the genuine *m*'s in the text). In addition lines have been drawn across the tops and bottoms of the *ṭ* and *ḫ* of *rṭḫ*. See the tracing. The stem of the *y* of *yhd* is rather long but this is explicable by its position at the junction of two lines. Littmann did not copy the complete line and so read it has l (or h) followed by ʿ. There is small to one side of the stem which Littmann thought could be the side-stroke of a h.

[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

l ṣʿd bn ḍb bn ʿbd bn ʾdm w ḥll h- dr dṯʾ f ʾyḍ f s^{2}ty f h bʿls^{1}mn qbll

By Ṣʿd son of Ḍb son of ʿbd son of ʾdm and he camped here in the season of the later rains and he stayed the dry season and the winter in this place. And O Bʿls^{1}mn [grant] a reunion

Apparatus Criticus:
Al-Jallad 2014: An ancient Arabian zodiac.

ls:ʿdbnḍbbnʿbdbnʾdmwḥllh-drdṯʾfʾyḍfs2tyfh bʿls1mn qbll
By Ṣʿd son of Ḍb son of ʿbd son of ʾdm and he camped here during the season of the later rains, then the dry sea- son, and then winter so, O Bʿls1mn, show benevolence Commentary.

yḍ: this rare reflex of the verb qyẓ, which exhibits the sound changes q > ʾ and ẓ > ḍ, is attested only once more in MKMR 9; see Al-Jallad (2015: §3.7.4.1) and Macdonald (2004: 498) for further discussion.
The same sequence is encountered in an inscription from the Ḥarrah, which is rather difficult to interpret:

Commentary:
Plus drawing. ʾyḍ is probably a dialectal variant of qyẓ (see also MKMR 9)

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria

Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī

Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

By Ḥrb son of ʿly son of Ḫbṯ son of {S¹mk} son of S¹wr son of Mlk son of Bdn and O Rḏy [grant] booty this year and *mʿn* ----

Apparatus Criticus:
LP 393: *[l-] h s²nt wm ʿlb* "to him in the year in which he directed his steps towards a hard and barrene ground (?)" for *h- s¹nt w mnʿ* ---- "this year ----"

Commentary:
The last 8 letters are on an adjacent face of the stone. The last four are less carefully carved than the rest of the text and it is difficult to make sense of them in this context.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

By Rbʾl son of ʿbd and he found the traces of his father so he wept and he remembered his brother *ʿwl* and he grieved in pain so he was sad and miserable

Commentary:
Perhaps cf. Ar. uns = "sociableness familiarity cheerfulness" Ar. ʿiyāl = "family household". fa min ʾayn al-hanaʾ ??

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined

and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.
