

Table 2: SPIRIT 2013 Checklist: Recommended items to address in a clinical trial protocol and related documents*

Section/item	Item No	Description
Administrative information		
Title	1	Descriptive title identifying the study design, population, interventions, and, if applicable, trial acronym – YES (line 1-3)
Trial registration	2a	Trial identifier and registry name. If not yet registered, name of intended registry – YES (line 48)
	2b	All items from the World Health Organization Trial Registration Data Set – NA
Protocol version	3	Date and version identifier – YES
Funding	4	Sources and types of financial, material, and other support – YES (line 392-
Roles and responsibilities	5a	Names, affiliations, and roles of protocol contributors – YES (page 1)
	5b	Name and contact information for the trial sponsor – YES (page 1)
	5c	Role of study sponsor and funders, if any, in study design; collection, management, analysis, and interpretation of data; writing of the report; and the decision to submit the report for publication, including whether they will have ultimate authority over any of these activities – YES (Line 394-396)
	5d	Composition, roles, and responsibilities of the coordinating centre, steering committee, endpoint adjudication committee, data management team, and other individuals or groups overseeing the trial, if applicable (see Item 21a for data monitoring committee) – YES (line 330-343)
Introduction		
Background and rationale	6a	Description of research question and justification for undertaking the trial, including summary of relevant studies (published and unpublished) examining benefits and harms for each intervention – YES (page 50-126)
	6b	Explanation for choice of comparators – YES (line 144-158)
Objectives	7	Specific objectives or hypotheses – YES (line 128-133)

Trial design	8	Description of trial design including type of trial (eg, parallel group, crossover, factorial, single group), allocation ratio, and framework (eg, superiority, equivalence, noninferiority, exploratory) – YES (line 136-157)
--------------	---	--

Methods: Participants, interventions, and outcomes

Study setting	9	Description of study settings (eg, community clinic, academic hospital) and list of countries where data will be collected. Reference to where list of study sites can be obtained – YES (line 139-144)
Eligibility criteria	10	Inclusion and exclusion criteria for participants. If applicable, eligibility criteria for study centres and individuals who will perform the interventions (eg, surgeons, psychotherapists) – YES (line 159-177)
Interventions	11a	Interventions for each group with sufficient detail to allow replication, including how and when they will be administered – YES (line 145-153)
	11b	Criteria for discontinuing or modifying allocated interventions for a given trial participant (eg, drug dose change in response to harms, participant request, or improving/worsening disease) – YES (line 216-221)
	11c	Strategies to improve adherence to intervention protocols, and any procedures for monitoring adherence (eg, drug tablet return, laboratory tests) – YES (line 229-236, line 243-248)
	11d	Relevant concomitant care and interventions that are permitted or prohibited during the trial – YES (Extended data-Drug interactions)
Outcomes	12	Primary, secondary, and other outcomes, including the specific measurement variable (eg, systolic blood pressure), analysis metric (eg, change from baseline, final value, time to event), method of aggregation (eg, median, proportion), and time point for each outcome. Explanation of the clinical relevance of chosen efficacy and harm outcomes is strongly recommended – YES (line 178-192)
Participant timeline	13	Time schedule of enrolment, interventions (including any run-ins and washouts), assessments, and visits for participants. A schematic diagram is highly recommended (see Figure 1) – YES (line 145-154 and line 251-273)
Sample size	14	Estimated number of participants needed to achieve study objectives and how it was determined, including clinical and statistical assumptions supporting any sample size calculations – YES (line 276-284)
Recruitment	15	Strategies for achieving adequate participant enrolment to reach target sample size – YES (LINE 152-155)

Methods: Assignment of interventions (for controlled trials)

Allocation:

Sequence generation	16a	Method of generating the allocation sequence (eg, computer-generated random numbers), and list of any factors for stratification. To reduce predictability of a random sequence, details of any planned restriction (eg, blocking) should be provided in a separate document that is unavailable to those who enrol participants or assign interventions – NA. This is an open label trial.
Allocation concealment mechanism	16b	Mechanism of implementing the allocation sequence (eg, central telephone; sequentially numbered, opaque, sealed envelopes), describing any steps to conceal the sequence until interventions are assigned – NA.
Implementation	16c	Who will generate the allocation sequence – NA. Who will enrol participants – YES (line 196-197); Who will assign participants to interventions – YES (line 196-97).
Blinding (masking)	17a	Who will be blinded after assignment to interventions (eg, trial participants, care providers, outcome assessors, data analysts), and how – NA.
	17b	If blinded, circumstances under which unblinding is permissible, and procedure for revealing a participant's allocated intervention during the trial – NA.

Methods: Data collection, management, and analysis

Data collection methods	18a	Plans for assessment and collection of outcome, baseline, and other trial data, including any related processes to promote data quality (eg, duplicate measurements, training of assessors) and a description of study instruments (eg, questionnaires, laboratory tests) along with their reliability and validity, if known – YES (line 251-273). Reference to where data collection forms can be found, if not in the protocol – YES (line 389 – Extended data)
	18b	Plans to promote participant retention and complete follow-up, including list of any outcome data to be collected for participants who discontinue or deviate from intervention protocols – YES (line 200-207, line 228-230, and line 254-255)
Data management	19	Plans for data entry, coding, security, and storage, including any related processes to promote data quality (eg, double data entry; range checks for data values). Reference to where details of data management procedures can be found, if not in the protocol – YES (line 340-352)
Statistical methods	20a	Statistical methods for analysing primary and secondary outcomes – YES (line 286-300). Reference to where other details of the statistical analysis plan can be found, if not in the protocol

- 20b Methods for any additional analyses (eg, subgroup and adjusted analyses) – YES (294-300)
- 20c Definition of analysis population relating to protocol non-adherence (eg, as randomised analysis), and any statistical methods to handle missing data (eg, multiple imputation) – NA.

Methods: Monitoring

- | | | |
|-----------------|-----|--|
| Data monitoring | 21a | Composition of data monitoring committee (DMC); summary of its role and reporting structure; statement of whether it is independent from the sponsor and competing interests – YES (330-343); and reference to where further details about its charter can be found, if not in the protocol (DMC charter – Extended data). |
| | 21b | Description of any interim analyses and stopping guidelines – YES (lines 212-214, lines 331-334), including who will have access to these interim results and make the final decision to terminate the trial – YES (lines 212-214) (lines 331-334) |
| Harms | 22 | Plans for collecting, assessing, reporting, and managing solicited and spontaneously reported adverse events and other unintended effects of trial interventions or trial conduct – YES (lines 222 – 227) |
| Auditing | 23 | Frequency and procedures for auditing trial conduct, if any, and whether the process will be independent from investigators and the sponsor – YES (lines 331-343) |

Ethics and dissemination

- | | | |
|--------------------------|-----|--|
| Research ethics approval | 24 | Plans for seeking research ethics committee/institutional review board (REC/IRB) approval – YES (lines 303-307) |
| Protocol amendments | 25 | Plans for communicating important protocol modifications (eg, changes to eligibility criteria, outcomes, analyses) to relevant parties (eg, investigators, REC/IRBs, trial participants, trial registries, journals, regulators) - YES (lines 306-307) |
| Consent or assent | 26a | Who will obtain informed consent or assent from potential trial participants or authorised surrogates, and how (see Item 32) – YES (lines 309-321) |
| | 26b | Additional consent provisions for collection and use of participant data and biological specimens in ancillary studies, if applicable - NA |
| Confidentiality | 27 | How personal information about potential and enrolled participants will be collected, shared, and maintained in order to protect confidentiality before, during, and after the trial – YES (lines 323-329, lines 345-352) |
| Declaration of interests | 28 | Financial and other competing interests for principal investigators for the overall trial and each study site – YES (lines 394-396) |

Access to data	29	Statement of who will have access to the final trial dataset, and disclosure of contractual agreements that limit such access for investigators – YES (lines 323-329)
Ancillary and post-trial care	30	Provisions, if any, for ancillary and post-trial care, and for compensation to those who suffer harm from trial participation – YES (lines 204-211)
Dissemination policy	31a	Plans for investigators and sponsor to communicate trial results to participants, healthcare professionals, the public, and other relevant groups (eg, via publication, reporting in results databases, or other data sharing arrangements), including any publication restrictions – YES (line 358-363)
	31b	Authorship eligibility guidelines and any intended use of professional writers – YES (line 361-363)
	31c	Plans, if any, for granting public access to the full protocol, participant-level dataset, and statistical code – YES (lines 358-360)

Appendices

Informed consent materials	32	Model consent form and other related documentation given to participants and authorised surrogates – YES (extended data)
Biological specimens	33	Plans for collection, laboratory evaluation, and storage of biological specimens for genetic or molecular analysis in the current trial and for future use in ancillary studies, if applicable – YES (line 258-273)

*It is strongly recommended that this checklist be read in conjunction with the SPIRIT 2013 Explanation & Elaboration for important clarification on the items. Amendments to the protocol should be tracked and dated.
