

S6 Table - The number of products per restaurant where the subcategory mean serving size had to be used to calculate either per 100g or per serving nutrient information. Restaurants are listed in descending order by the proportion of products belonging to that category where the subcategory mean serving size had to be used.

Restaurant	No. of Products Affected	Proportion of Affected Products / Total Products (%)	Serving Size (g) for Products where Serving Size was Provided				
			Mean	SD	Median	Lower Quartile	Upper Quartile
Burger King	1	3	179.30	85.53	150.87	108.17	246.89
Caffé Nero	0	0	104.00	74.22	93.50	45.00	133.25
Costa	0	0	90.86	63.87	78.00	41.50	130.00
Domino's	6	2	209.87	75.62	242.34	145.26	260.59
