

Raw data to Figure 4A

Figures with SNRNP200 and SART3 staining were cropped from 30s exposure

Figures with PRPF31 staining were cropped from 5min exposure

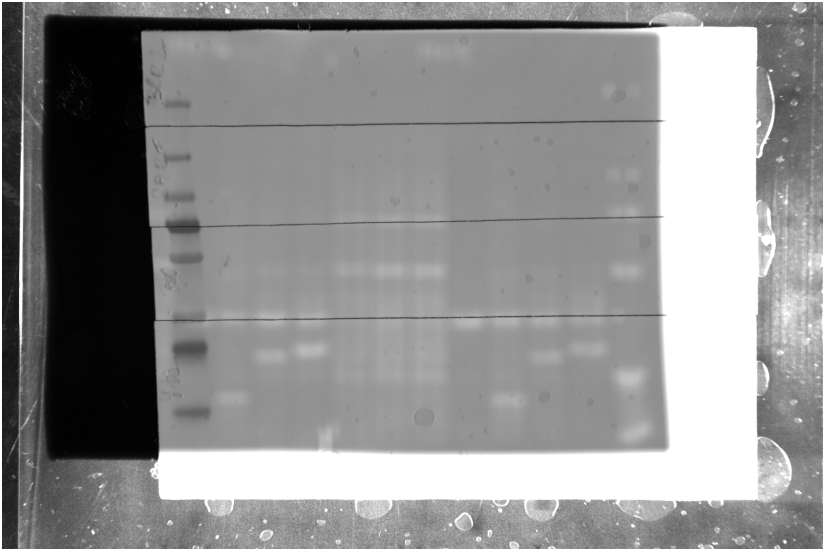

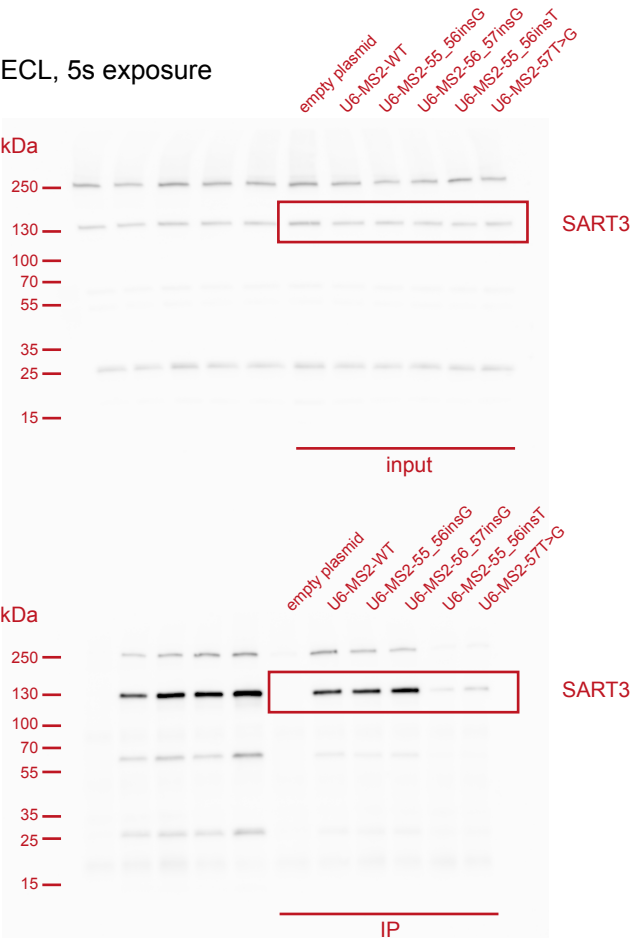

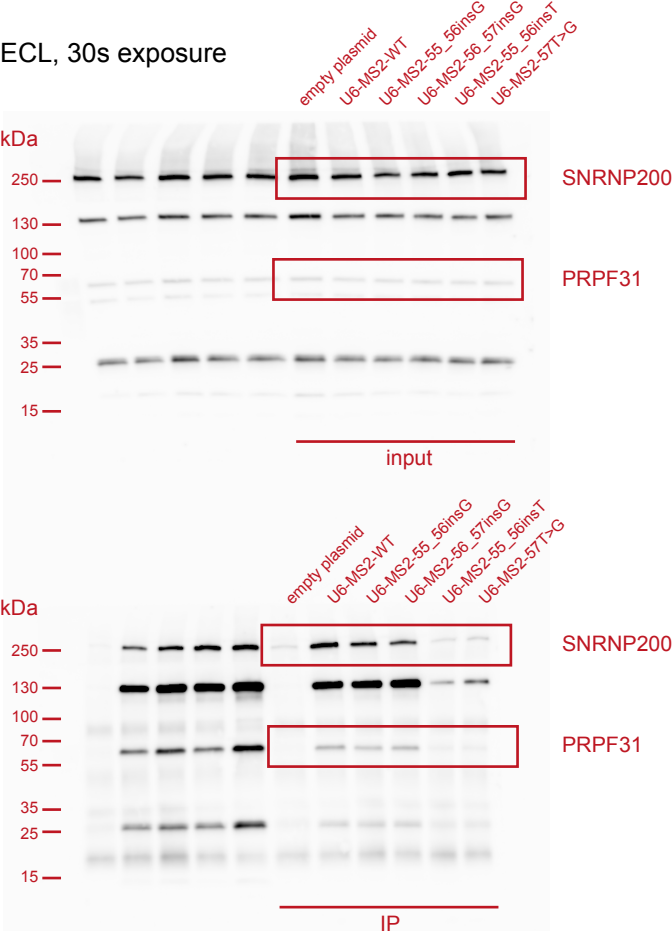

Photo of the cutted membrane (for staining with individual antibodies)
the black bands indicate the protein marker, white bands are background
(contamination of the machine)

Raw data to Figure 4B

Figures with SART3 staining were cropped from 5s exposure

Figures with SNRNP200 and PRPF31 staining were cropped from 30s exposure

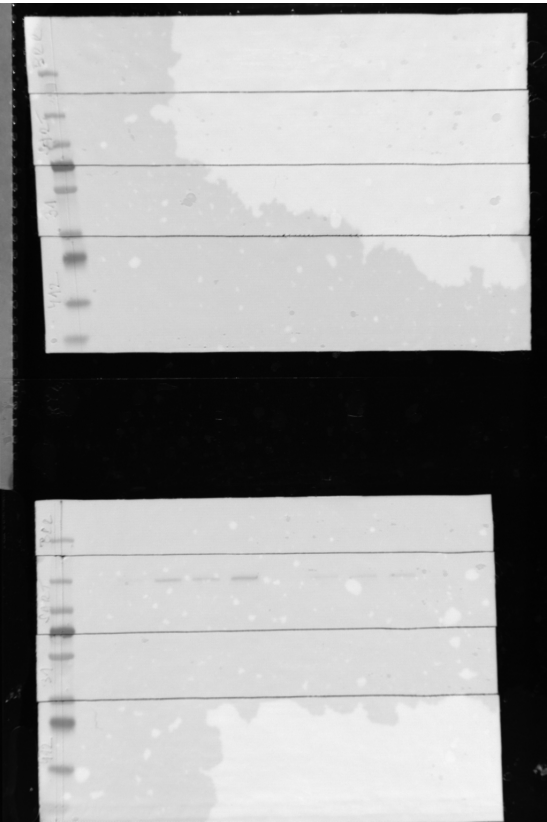

Photo of the cutted membrane
(for staining with individual antibodies);
the black bands indicate the protein marker
