

The graph displays the current-voltage (I-V) characteristics of a device over six consecutive scans. The x-axis represents Voltage [V] from 2.00 to 4.00. The y-axis represents current, with a scale break between 100 and 1000. The legend indicates the scan number for each curve: Scan # 0 (lightest green), Scan # 1, Scan # 2, Scan # 3, Scan # 4, and Scan # 5 (darkest green). The curves show a transition from a low-current state to a high-current state, with the transition voltage shifting to lower values from scan 0 to scan 5.

Voltage [V]	Scan # 0	Scan # 1	Scan # 2	Scan # 3	Scan # 4	Scan # 5
2.00	~100	~100	~100	~100	~100	~100
2.25	~100	~100	~100	~100	~100	~100
2.50	~100	~100	~100	~100	~100	~100
2.75	~100	~100	~100	~100	~100	~100
3.00	~100	~100	~100	~100	~100	~100
3.25	~100	~100	~100	~100	~100	~100
3.50	~100	~100	~100	~100	~100	~100
3.75	~100	~100	~100	~100	~100	~100
4.00	~100	~100	~100	~100	~100	~100
