

Study on clinicians' cognitive process and support needs when facing postoperative complications

STAFF CONSENT FORM

Thank you very much for taking part in this study. You will participate in a 30–40min semi-structured interview using the applied cognitive task analysis (ACTA) to elucidate your decision-making process and support needs when facing postoperative complications on the ward.

This session will be recorded by the research team, transcribed and identifying data removed from the transcript. After transcription, personal information will be stored separately and linked to the transcript through a unique identifier number. You will not be identified in any future publications, but some specific quotes may be anonymously used.

More detailed information is available in the study participants information sheet here attached. The research team will also be happy to answer any questions you may have.

Please sign this sheet to confirm that you have understood the information given and consent to take part in the study.

Many thanks!
