Clinical trials reporting on EudraCT

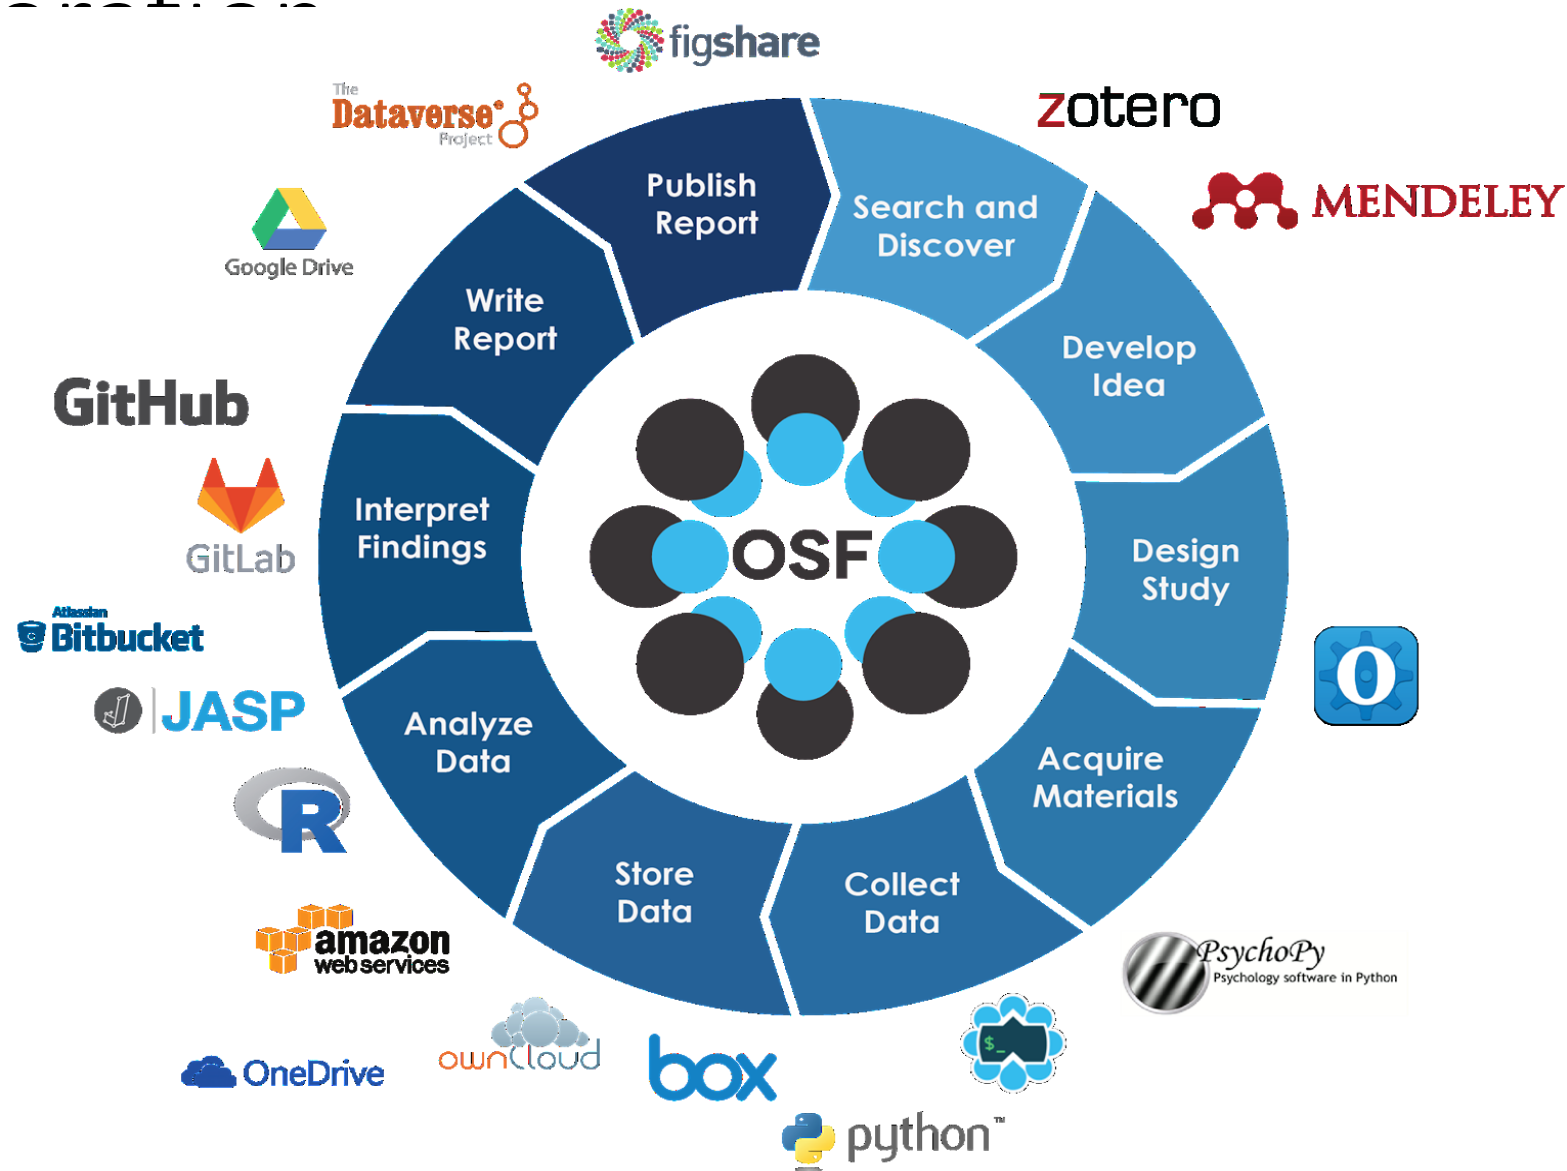

At 9:10 AM on Monday, February 21, 2022:

Karolina Strzebonska added file "**Data processing/Inclusion_exclusion/Study selection start on 1st February/Cut-off points.docx**".

Collaboration

Storage and Sharing

Figure 2 shows the proportion of trials that reported at all, the proportion of compliant trials, and the cumulative number of overdue, unreported trials, at the midpoint of each month from March, 2018, to September, 2019. Our findings show that although overall reporting has increased gradually over time, compliance has remained stable at approximately 40% since July, 2018. Copies of all raw and processed data used for this analysis are available via the Open Science Framework.²²

Description:

Data to examine results reporting to ClinicalTrials.gov under the FDAAA 2007 Final Rule

License: [Add a license](#)

Wiki

This contains the raw and processed data files used for our analysis of US trial reporting under the FDAAA 2007 Final Rule published in [The Lancet](#).

The code for this project is available on [Github](#) and archived on [Zenodo](#).

The raw data is JSON strings (1 per trial) in a p delimited CSV however this can also be parsed as ndjson. The processed data is a standard CSV.

BMJ Open Results availability and timeliness of registered COVID-19 clinical trials: interim cross-sectional results from the DIRECCT study

METHODS

In this first phase of the DIRECCT study, we examined trials completed during the first 6 months of the pandemic (ie, through 30 June 2020). The full protocol for this study, with additional methods details, was preregistered on the Open Science Framework (<https://osf.io/26yuj/>).

Summary

Provide a narrative summary of what is contained in this registration or how it differs from prior registrations. If this project contains documents for a preregistration, please note that here.

We include version 1.1 of our prespecified protocol which includes detailed descriptions of our methods, planned analyses, and overall information about the project. Data collection will begin on 1 July 2020.

Registration Forms and Templates

Registration Forms	Description	Templates
OSF Prereg* (citable from this preprint)	This is our standard, comprehensive, and general purpose preregistration form.	Google Doc , OSF Workflow , R Markdown by Frederik Aust , R Markdown by James Bartlett
Open-Ended Registration	Summary of registered work with a time-stamped snapshot of a research project. Use this one if you are registering a completed project with data or materials.	Word , GoogleDoc
Qualitative Preregistration* (Haven et al 2020)	Template for registering primarily qualitative work.	Word , GoogleDoc , FAQ
AsPredicted Preregistration* form here	Eight questions derived from content recommended by AsPredicted.org .	Word , GoogleDoc
OSF-Standard Pre-Data Collection Registration	State whether data have been collected or viewed and other pertinent comments. Use this one if your pre-analysis plan is uploaded on OSF as a doc	Word , GoogleDoc
Replication Recipe (Brandt et al., 2013): Pre-Registration*	Register a replication study with a series of questions regarding the original work.	Word , GoogleDoc
Replication Recipe (Brandt et al., 2013): Post-Completion	Register a replication study after it has been conducted with questions regarding the outcomes of the replication.	Word , GoogleDoc
Pre-Registration in Social Psychology (van 't Veer & Giner-Sorolla, 2016)*	Preregister a research study outlining the hypotheses, methods, and analysis plan	Word , GoogleDoc , OSF
Registered Report Protocol Preregistration	Register your protocol AFTER having been given "in-principle acceptance" from a Registered Report journal	Word , GoogleDoc , OSF Workflow
Secondary Data Preregistration*	For preregistering a research project that uses an existing dataset.	OSF Page , Example , FAQ

Not Available on OSF

These forms are not available as guided workflows on the OSF, but rather as template docs that you can fill out and register using the "Open-Ended Registration" form. We are always evaluating our guided workflows and will likely include one or more of these in the future.

Registration Forms	Description	Templates
OLD "Qualitative Research Preregistration"	This is an earlier version of the form that is now included on OSF	OSF page
Cognitive Modeling (Model Application)*	Use when you wish to apply a cognitive model as a measurement tool to test hypotheses about parameters of the cognitive model	OSF Page and Preprint
fMRI Preregistration Template*	This project provides a detailed preregistration template for fMRI studies and provides some guidance for common difficulties that can occur for fMRI preregistration projects.	OSF page
Open Stats Lab and Project Tier*	This preregistration template is geared towards researchers who have little experience with preregistering studies	OSF Page

Study Information

Hypotheses *

List specific, concise, and testable hypotheses. Please state if the hypotheses are directional or non-directional. If directional, state the direction. A predicted effect is also appropriate here. If a specific interaction or moderation is important to your research, you can list that as a separate hypothesis.

OSF Preprints

Enhance research visibility

The image shows the OSF Preprints website interface. At the top, the OSF Preprints logo is displayed. Below the logo is a search bar with the placeholder text "Search preprints..." and a "Search" button. Under the search bar, it states "2,082,216 searchable preprints as of September 01, 2017". Below this, the word "or" is centered. A green button labeled "Add a preprint" is centered below "or". Below the button is a link labeled "See an example". At the bottom, the text "Browse by subject" is followed by four blue buttons arranged in a 2x2 grid: "Architecture", "Arts and Humanities", "Business", and "Education".
