The screenshot displays the OSFHOME interface for the OxfordPERL project. The top navigation bar includes links for My Quick Files, My Projects, Search, Support, Donate, and a user profile for Amy Gillespie. Below this, a secondary bar highlights OxfordPERL and lists various project components like Files, Wiki, Analytics, Registrations, Contributors, Add-ons, and Settings. The main content area is divided into three sections: Wiki, Files, and Components.

**Wiki Section:** Features the PERL logo (Psychopharmacology & Emotion Research Laboratory) and a description: "We explore how the brain processes emotional information and how this is influenced by brain chemicals and medicines. This helps us to understand disorders such as depression and anxiety and to understand and contribute to the development of drug and psychological treatments." A "Read More" link is provided below the text.

**Files Section:** Includes a prompt to "Click on a storage provider or drag and drop to upload". Below this is a table listing files and folders:

10.1 Duplicate the "Documentation: PERL Study Template" project

All new studies should have project specific documentation stored on OSF. It is the study researcher's responsibility to set up any new projects and maintain project documentation on OSF.

We have created a template project which has blank components ('space holders') for each of the sources required to fulfill full transparent reporting of a research project, including those identified by COBIDAS (<https://www.biorxiv.org/content/early/2016/07/10/054262>): <https://osf.io/6dnmp/>. You will be added as a contributor on this project once you have sent your profile url to Wendy Howard (wendy.howard@psych.ox.ac.uk)

Navigate to this template, then follow the instructions here to "Create a Project from a Template", following the "Duplicate Template" option: <https://help.osf.io/hc/en-us/articles/360019930093-Create-a-Project-from-a-Template>. Note that if more than one person is working on a research project, only one of you needs to create the project then add the others as contributors.
