

Supplement 4

Effects of suspected perpetrator on the probability of child protection procedures (CPS involved, report to LE) and therapeutic interventions during the FU period.

	CPS involved			
Suspected type of perpetrator	n	%	OR (95% CI)	p
Parent yes	72	94	2.446 (0.677 to 9.212)	0.17
Parent no	30	83	-	
Parent unknown	14	30	0.462 (0.12 to 1.755)	0.252
	Reported to LE			
Suspected type of perpetrator	n	%	OR (95% CI)	p
Parent yes	36	48	0.420 (0.159 to 1.044)	0.068
Parent no	25	69	-	
Parent unknown	5	25	0.151(0.038 to 0.518)	0.004
	Therapeutic intervention during FU period**			
Suspected type of perpetrator	n	%	OR (95% CI)	p
Parent yes	48	65	0.344 (0.091 to 1.055)	0.081
Parent no	30	88	-	
Parent unknown	17	81	0.821 (0.16 to 4.615)	0.811

* There were patients with more than one type of suspected CM. Therefore, the total number of suspected CM types exceeds the total number of patients.

** For 8 patients (5.8%) it was unclear whether a report to LE was filed. For 10 patients (7.1%) it was unclear whether they had received therapeutic interventions during the FU period.
