

Corrigendum

Corrigendum to “Opposing controls on the isotopic signature of dissolved iron in hydrothermal plumes” [*Geochim. Cosmochim. Acta* 202 (2017) 1–20]

The authors regret a mistake in Eq. (1) of Section 2.5 where the numerator and denominator of the Fe isotope ratios are inverted as published. The equation should read:

$$\delta^{56}\text{Fe}(\text{‰}) = \left(\left(^{56}\text{Fe}/^{54}\text{Fe} \right)_{\text{sample}} / \left(^{56}\text{Fe}/^{54}\text{Fe} \right)_{\text{IRMM-14}} - 1 \right) \times 1000 \quad (1)$$

The authors would like to apologise for any inconvenience caused.
