University of Oxford
Michaelmas Term 2010
ABSTRACT

This thesis is a comprehensive investigation of Roman African cookwares that examines their contribution to studies on the consequences of the incorporation of Africa into the Roman imperial economy. It aims to synthesise and analyse the most significant evidence and examines how the flow of capital, technical knowledge and people, between provinces and regions, affected production, trade and distribution trends.

The technology and organisation of Roman African cookware production are examined first, in order to create a solid foundation for the following distribution study. Scientific analyses of African cookware samples from production and consumption sites offer important additions to our knowledge of the fabric composition, technical superiority, provenance and movement of these wares around the Mediterranean. The key discussion focuses on the commercial dynamics of Roman African cookwares from local, regional and Mediterranean-wide perspectives. Beginning at the production sites, the research investigates the management and transportation of these wares from major ports in Africa Proconsularis to Mediterranean ports, and beyond. A chronological assessment of the evolution of cookware production and trade in relation to periods of political and economic change reveals the significant contribution these wares can make towards tracing and even anticipating major stages in the evolution and eventual decline of Roman economic systems. Other key achievements include the creation of a new illustrated typology with profile drawings of all the cookware forms; a gazetteer of all known African cookware production sites and the forms they produced; and a synthesis and catalogue of African cookware fabrics.

The importance of this research lies in the fact that although the abundance of Roman African cookwares on Mediterranean sites is well recognised, a catalogue and analysis of production and trade has never previously been attempted.
# Table of Contents

## Part I: Text

**List of Figures**
- List of Tables
- List of Plates
- Conventions

**Introduction**
- The Value of African Cookware Studies
- Research Aims

**Chapter 1: Approach and Methodology**
- General Approach
- Chronological and Geographical Spread
- The Importance of Ceramic Typologies
- Quantification
- Scientific Analysis
- Interpretation of Data

**Chapter 2: Form and Function**
- Defining Cookwares
- Function and Culture
- Transportability
- Technological Aspects of Function
- ACW and Ritual
- Literary Sources
- ACW Form and Function in Context

**Chapter 3: The Technology of Production**
- The Perfect Cookware
- Raw Materials
- Forming
- Finishing
- Drying
- Kilns and Firing
- Concluding Remarks

**Chapter 4: Production Sites: A Distribution Study**
- Organisation of the Gazetteer
- Site Selection
- Characterising Site Types
- Site Distribution Study
- Linking Shape Geography to Shape History
- Communications and Transport
- ACW Production Phases
- Concluding Remarks
CHAPTER 5: ORGANISATION OF PRODUCTION
Location and Organisation of Space 134
Scale, Standardisation and Specialisation 158
ACW and its Relationship to Amphorae and ARS 166
Ownership and Control 175
Concluding Remarks 188

CHAPTER 6: FABRIC ANALYSIS
History and Purpose of Fabric Analysis 194
ACW Fabrics: Previous Characterisations 197
New ACW Fabric Analysis 198
Concluding Remarks 210
Tables and Illustrations 215

CHAPTER 7: THE TRADE, DISTRIBUTION AND ECONOMY OF ROMAN AFRICAN COOKWARES
The Foundations of Growth: Production Technology and Trade 266
Birth, Development and Death of ACW Trade 278
The Distribution of ACW 289
Economic and Political Forces Behind ACW Production and Trade 335

CONCLUSIONS 363

PART II: APPENDICES AND BIBLIOGRAPHY

APPENDIX I: ROMAN AFRICAN COOKWARE TYPOLOGY AND CONCORDANCE 369

APPENDIX II: GAZETTEER OF ROMAN AFRICAN COOKWARE PRODUCTION SITES AND THEIR FORMS 489

APPENDIX III: ROMAN AFRICAN COOKWARE FABRIC CLASSIFICATIONS 631

BIBLIOGRAPHY 661
