Preface

Volume I of the present thesis is complemented by three appendices, which include material that has been previously both published and unpublished, and for the purposes of this study have been combined.

Appendix 1 consists of a site Gazetteer, which includes information about all sites mentioned in the text, including location, period of occupation and bibliography. Each site is given a number consisting of the capital letter S (standing for Site) and a serial number (e.g. S04). They are divided according to their location within Laconia. The location of each site can be found in figures 2.1, 2.2, 3.1, 3.6 and 3.7.

Appendix 2 presents all the information regarding burials from the LBA and EIA. It includes all excavated chamber and tholos tombs and their associated burial offerings and it constitutes the dataset on which the discussion of section 2.3 of Volume I is based. It also contains all known Protogeometric and Geometric burials, including burial practices, grave offerings, sex, age (when known) and relevant bibliographic references.

Appendix 3 contains the LBA and EIA pottery catalogue arranged in two main sections: the LH IIIC and SubMycenaean periods and the EIA (Protogeometric and Geometric periods). The shapes are organised according to their associated FS numbers. Each vessel was given a code consisting of the abbreviation of the shape and a serial number. Information provided for each entry includes: the site of provenance, dimensions (when known), decoration, date and bibliography.

Spartan Plain

1. Sparta (S01)

Period of occupation: LH II to LH IIIA, PG to late Roman.

***Description*:** Reports indicate the discovery isolated Mycenaean finds throughout the area of modern Sparta and its suburbs (Kladas and Xarision). Particularly interesting is the discovery of a tholos tomb and cist tombs at Polydendro. The area seems to have been abandoned during the LH IIIC and SubMycenaean period, but occupation is attested again during the Protogeometric and Geometric periods. Graves and ceramics from the period are found distributed in clusters throughout the area of the modern town, especially in the area of Limnai, in the north-east.

2. Sparta, Karavas (S02)

***Period of occupation*:** EH III, LH IIIB to LH IIIC.

***Description*:** Excavations in the suburb of Sparta, in Karavas, has uncovered remains of a building complex dated to the LH IIIB and LH IIIC periods. Furthermore, an area of the site contained evidence of occupation during the EH III period as well.

***Bibliography*:** Maltezou 2016: 198-199.

3. Menelaion (S03)

Period of occupation: MH to LH IIIC Early, Archaic to Classical

Description: Located approximately 2km south-east of modern Sparta, the site of the Menelaion occupies three hills: the Menelaion, Aetos and North hills. It is at the Menelaion hill where the most significant structures of the site are located, Mansions I and II. Mansion I was a complex measuring at least 23m N-S by 25m E-W and it contained 15 rooms and passages. The Mansion's walls were made of rough stone blocks, packed with small rubble and the floors consisted of a thin layer of shingle over the levelled natural soil. It is likely that the shingle was also covered with schist slabs, as evinced at the south-east corner of Room 8.

As a consequence of the construction of Mansion II over the same location, much of Mansion I was destroyed. A deposit of approximately 0.05-0.10m was found over the shingle floors of Mansion I, and it contained vessels dated to the LH IIIA1 period. Hence, the excavators have interpreted this deposit as an occupation layer left by the builders of Mansion II. This remains of this structure were also problematic since it had been excavated by a previous campaign in 1909 and 1910. Nonetheless, at least thirteen rooms were identified (Rooms I-XIII). Signs of fire at this structure strongly indicates that Mansion II was destroyed during the LH IIIB2 period.

The Northern building, as its name suggests, is located to the north of Mansion II and it contained at least nine rooms. A total of five building phases were identified, based on 'architectural reasoning' rather than the stratigraphy of the building. The finds were determined to be 'surprisingly scrappy' and not *in situ*, but they rather belonged to a 'building fill'. Nonetheless, the dating of the material indicates that phases 3 and 4 are contemporary to Mansions I and II, respectively.

Building A is located on Aetos hill, approximately 450m to the south-west of the Mansions at the Menelaion Hill. The structure belongs to of a complex comprised of four structures: Building B, the Great Terrace wall, the 'Bastion' and the 'Squatter's' building. Building A was most likely a rectangular structure, but only parts of its northern (11.25m E-W) and eastern (5.50m N-S) walls survive. In the

north wall, a well-preserved doorway was uncovered, close to the NW corner of the structure. Interestingly, the material chosen for the threshold slab was that of a hard, blue limestone. The source of this stone cannot be found in Laconia and it remains unidentified. The inner faces of the walls were mud-rendered and one undecorated piece of plaster was found inside the building. Yet, many fragments of painted plaster were found within destruction debris on the north face of the northern wall. Dating of its construction was secured to the LH IIIB by a large volume of pottery (1.265 kg) found within the foundation trenches of the remaining walls. The interior, however, was found to be almost empty, with traces of burning throughout what was possibly a floor surface (Catling *et al* 2009: 227-229). The building was probably abandoned after the collapse of the Great Terrace wall, during the LH IIIC Early period.

Building B was a rectangular structure located uphill, to the north of Building A. Four building phases were identified, three of which are dated to the period between LH IIB and LH IIIB. Traces of a pebble bedding layer was noted throughout the interior of Phase I of the structure, a feature which was also seen in Mansion I. No material dating to the LH IIIA2 was identified associated with Building B, which indicates that the structure was abandoned during this period (Catling et al 2009: 198-207).

The Great Terrace wall was built between Buildings A and B, over a steep scarp. The wall extends 18m E-W and had a thickness of 1.20m. However, only the lowest course of masonry survives. Unfortunately, no deposits from the fill behind the wall have been identified, thus the date of its construction is uncertain. Nevertheless, the wall's collapse can be suggested by a deposit found in between its debris over a road of yellow shingle. This deposit contained a significant quantity of LH $IIIB_2$/IIIC Early decorated vessels.

To the east of the Great Terrace wall are the remains of another structure, that of the 'Bastion'. This structure is roughly rectangular, measuring nearly 8m N-S by 6m E-W. Only three walls remain, forming an 'u' shape over the contour of the hill-slope. The material used consisted of water-worn stones, including limestone, conglomerate and schist. The walls are unusually broad, which is

inconsistent with any of the domestic walls found at the Menelaion. It was possibly connected to the Great Terrace wall at its eastern end. It is not clear when the Bastion was erected, but pottery deposits in its destruction debris date its final period to the end of the LH IIIB.

After the destruction of Great Terrace wall and the Bastion, the area was reoccupied during the LH IIIB2/ IIIC Early, as can be seen by the 'Squatter's' buildings. The latter consisted of two structures, one over the remains of the Bastion and the other over the foundations of the Great Terrace wall. The former was constructed with materials salvaged from the fallen Terrace wall and a group of under-fired plain pottery was associated with it. The latter consisted of a much larger building, measuring at least 12m E-W. The northern wall of this second structure was that built over the remains of the Terrace wall. To the west end of a wall, fragments of a N-S wall suggest a room. It was in this room that a number of HBW was found.

Lastly, remnants of a shrine were excavated to the west of the Menelaion hill. The examinations of the associated finds indicates that cult practices started at the shrine during the Late Geometric period.

4. Kouphovouno (S04)

Period of occupation: EBA, LBA.

***Description*:** The most recent survey in the area of the site has shown that occupation continued in a sporadic fashion from the Middle Neolithic to the Late Roman period. Pottery from the LBA was thinly distributed, but could still indicate a settlement.

***Bibliography*:** Waterhouse and Hope Simpson 1960: 72; Cavanagh *et al* 2007: 11-101.

5. Amyklai (S05)

Period of occupation: EH II- Classical.

***Description*:** Excavations show that the Aghia Kiriaki hill has been occupied at least since the EH period. Evidence of occupation of the site becomes clear again during the LH IIIB2/IIIC period, with the establishment of the sanctuary. The sanctuary remained active throughout the EIA into the Archaic and Classical periods.

Nonetheless, investigations in the surrounding area of the Aghia Kiriaki hill have a possible settlement site dated to the period between the LH IIIA and LH IIIB periods. Moreover, near Spilakia, a chamber tomb cemetery has been excavated and shown to had been in used during the same period. Finally, a Protogeometric cemetery was found at Sklavochori, indicating a settlement of the same period in the vicinity of the sanctuary.

6. Lefka (S06)

Period of occupation: G to Archaic

***Description*:** A structure from the Archaic period was discovered at Lefka, approximately 2km south-east of the sanctuary of Amyklai. However, a number of Geometric sherds were also found in the deposits associated with the structure.

***Bibliography*:** Tsiaggouris 2016d: 183.

7. Vapheio-Palaiopyrghi (S07)

Period of occupation: LH II – LH IIIA.

***Description*:** One of the most important discoveries in Laconia, the Vapheio tholos was excavated in 1988 by Tsountas. The chamber has a diameter of 10.35m and the dromos a length of 29.80m. The tholos had been robbed, nonetheless, an array of prestigious objects, such as fourteen seal stones, two silver pins, four gold plates, two gold button, one bronze pin, two gold rings, twenty-two gold beads, fragments of ivory, pieces of stone vases and a few clay vessels were found within. Furthermore, a cist grave dug into the floor of the tholos, dated to the LH IIB period, was found intact and it contained several weapons, silver vases, stone vessels, jewellery, seal stones and a unique set of metal objects associated with cultic sacrifice. The site associated with the tholos, at Palaiopyrghi, has been only partially excavated. Yet, evidence suggests the site was occupied throughout the Mycenaean era.

Lastly, at approximately 200m southeast of the tholos, a conglomerate quarry was found. Studies of the cuttings on the stone suggest that the quarry was likely to have been in used during the Mycenaean period as well.

8. Melathria (S08)

Period of occupation: LH IIIA-LH IIIB1.

Description: Four chamber tombs were excavated in the area of Melathria, approximately 2km north from Skoura. The largest chamber tomb (Σ1) measured 2.60m by 3.60m and it contained one burial pit and the remains of other burials in the west corner of the chamber. Chamber Σ2 measured 2.40m x 3.15m and it contained only one burial pit. Chamber Σ3, Σ4 and Σ5 were very small and,

unfortunately, nothing remained of its burials. Two burial pits were discovered within Chamber A1 (3.20mx2.50m) as well as piles of previous offerings and burials, at the southern and northern ends of the chamber. For a list of the objects found, see Appendix 2.

Bibliography: Demakopoulou-Papadoniou 1977: 29-60; Gallou 2020: 25-29.

9. Skoura (S09)

Period of occupation: EH – LH IIIC Early.

Description: Two sites in the vicinity of Skoura have been found to contain ceramics from the EH to the LH IIIC period. At Vouno Panagias, surveys have discovered EH and MH sherds, suggesting the existence of an important settlement in this area. The pottery dated to the transition between MH and LH could be characterised as 'Minoanising', similar to the examples from Aghios Stephanos. The LH period is also represented, with most sherds dating to the period between LH IIIA and LH IIIB.

Bibliography: Banou 2009: 77-84.

10. Aghios Georgios, Skoura (S10)

Period of occupation: LH IIIA to LH IIIB/LH IIIC Early.

***Description*:** A number of plundered Mycenaean chamber tombs were found near the village school. It has been noted that some have stepped dromoi. Sherds discovered during survey were dated to the LH IIIA-LH IIIB period with a few examples dated to the LH IIIB/IIIC Early.

Bibliography: Waterhouse and Hope Simpson 1961: 145; Banou 2009: 77-84.

11. Lymbiada (S11)

***Period of occupation*:** EH, LH III

Description: A hand-made EH ring base and the handle of a LH III jug indicate the existence of a small Bronze Age settlement.

***Bibliography*:** Waterhouse and Hope Simpson 1961: 135.

12. Aghios Vasileios (S12)

Period of occupation: MH – LH IIIB2/C

***Description*:** At least five structures have been identified at the site of Aghios Vasileios, Buildings A to E. Building A can be shown at this time to have contained at least eight rooms. The pottery associated to the structure indicates its use during the MH to the LH IIIA1 periods, as well as a phase of re-occupation during the LH IIIB2/IIIC period. Room 3 contained a large quantity of weapons as well as the remains of a boar's tusk helmet. Room 5 contained small gold sheet decorations, a neck of a stone vase, a bull figurine, the inlay from a sword and an Egyptian scarab. To the east, in Room 10, there were a number of tiles, undecorated vessels and barley. Most of the vessels were undecorated, but a burnt layer contained a large bronze lamp, a dagger, two knives, a gilded bronze seal ring, finials, a small Egyptian ivory seated figurine, semiprecious stones and decorative glass plaques.

Little information has been published about Building B. The most recent reports describe the unearthing of a number of fragments of wall paintings, which depict a lower leg clad in a greave on a blue background, a female head set within a banded border and part of a chariot wheel. More fragments were found in test trenches to the west of Building B. These are decorated with griffins and other animals, a rocky landscape, floral motifs, spiral motifs and dentil patterns. Sherds associated with Building B, including carinated kylikes and a cooking tripod, date the structure's occupation to the LH IIIA2 period.

Building Δ consists of the most complex structure within the site. One of its main elements is a courtyard flanked by two walls on its south and west sides. Three large stone bases with tenons on their upper surfaces were set on the transverse axis of the building. Two smaller stones in between were found parallel to both the south and west walls. An extensive clay floor was also associated with the structure, which showed traces of burning. Fragments of a mortar and pebble floor were found above the clay surface, which indicate that the structure had a second floor. Furthermore, also above the clay floor, the remains of a Linear B Archive were found. It is likely that originally it was located on the upper storey. At this point, excavators theorized that Building B was destroyed by fire at the end of LH IIIA2 or early LH IIIB1, and that there was a phase of re-occupation between LH IIIB and LH IIIC.

There is little information regarding the remaining buildings, Γ and E. Nevertheless, it has been reported that the former was a later structure ('post-Byzantine') built over the remains of Building A.

An extramural cemetery from the MH III to the LH II period is located approximately 50m north of the palace. A total of 25 burials were found within cists and pits, containing adults, infants and neonates. Most burials were unfurnished; the offerings that were found consisted of one or two small vases, usually a drinking cup and a small jar. Lastly, a cluster of chamber tombs, in use from the LH I to the LH IIIA1 periods, were discovered in the vicinity of the palace. One of the chambers had been used as a dump after the collapse of its floor, and it was found to contain a large quantity of broken vessels, fragments of wall painting, terracotta figurines and an amulet.

13. Vrysika (S13)

Period of occupation: EH, LH IIIA – LH IIIB, Late Classical/Hellenistic

Description: In the 2019 conference at the Netherlands Institute at Athens, M. Tsouli, A. Kotsi and D. Vlachakos presented excavations undertaken by the Greek Archaeological Service in Vrysika. Four buildings were excavated, of which one consisted of a megaron. All structures were built during the LH IIIA period. A small number of objects was found associated to these buildings, including a kylix, loom weights and twelve figurines. It is likely that the Mycenaean settlement was built over an important EH settlement.

14. Anthochori (S14)

Period of occupation: EH II, MH, LH IIIA to Roman period.

Description**:** A Mycenaean structure, burial and sherds were discovered over a large area ca. 100m west of the Church of the Metamorphosis. The area seems to had been in use until the Roman period. A significant amount of PG sherds was found to the west side of the excavation.

15. Goritsa (S15)

Period of occupation: EH, MH and LH I to LH IIIB.

***Description*:** Surface finds suggest a considerable Bronze age settlement in the region. There are reports of late Mycenaean chamber tombs, but these have not been identified.

***Bibliography*:** Waterhouse and Hope Simpson 1960: 83; Demakopoulou 1982: 113.

Mount Parnon

16. Geraki (S16)

Period of occupation: FN to Middle Helladic; Protogeometric to Byzantine.

***Description*:** Evidence of human activity has been identified from the Final Neolithic through the Middle Helladic periods, and from the Protogeometric through Hellenistic times. The Mycenaean period, however, is represented by only three terracotta figurines and the EIA by a small number of sherds.

Bibliography: Waterhouse and Simpson 1960: 85; Demakopoulou 1982: 110-111; Tomlinson 1995-1996: 13; Blackman 2000-2001: 33; Crouwel 2009: 67-73; Crouwel *et al* 1995; Crouwel *et al* 1997 and Crouwel *et al* 2012.

17. Vrondama (S17)

Period of occupation: LH III, Protogeometric/Geometric, Classical, Hellenistic.

Description: On a hill approximately 2km west of Vrondama, a few fragments of LH III kylikes and LH pithoi were found. From the village itself, Coulson identified two vases, an askos and an oinochoe, as examples from the PG/G period.

***Bibliography*:** Waterhouse and Hope Simpson 1960: 83; Coulson 1988: 21-24.

Eastern Vardounia

18. Daphni, Louria (S18)

Period of occupation: LH III.

***Description*:** Cemetery found to contain pits and chamber tombs on the east and south slope of a hillock. In total, two small chamber tombs and a pit grave (LH IIIA2-IIIB) were excavated and found to contain human bones and pottery. The pottery dates the site to the LH III period.

***Bibliography*:** Maltezou 2016d: 529-530; Gallou 2020: 31-32, 52.

19. Krokeai (S19)

Period of occupation: LH II – LH IIIC.

***Description*:** A plundered shaft grave (3mx1.50mx2m) covered over with stone slabs was excavated by Tsountas. The grave is most likely dated to the LH II-LH III period. Sherds from the LH IIIB and LH IIIC were found on the same hill.

Bibliography: Waterhouse and Hope Simpson 1960: 103; Demakopoulou 1982: 108-109.

Helos Plain

20. Cranae (S20)

Period of occupation: LH IIIA – LH IIIC.

***Description*:** A considerable quantity of LH III sherds were found, mainly dated to the LH IIIA and LH IIIB periods.

Bibliography: Waterhouse and Hope Simpson 1961: 114; Demakopoulou 1982: 112-112.

21. Mavrovouni (S21)

Period of occupation: EH, LH IIIB – LH IIIC, PG.

***Description*:** A Mycenaean chamber tomb cemetery containing at least seven chambers. A number of sherds from the EH, LH IIIB-IIIC and PG period were also found in the upper terraces of the same hill. The only site, after Amyklai, where a sword from the Protogeometric has been found in Laconia.

***Bibliography*:** Waterhouse and Hope Simpson 1961: 117; Demakopoulou 1982: 112-113; Cavanagh and Mee 1998: 66; Gallou 2020: 62.

22. Stena (S22)

Period of occupation: PG

Description: At approximately 3km south-west of Gythion, two Protogeometric vases were found with a fragment of an iron weapon (spear?). The context of these objects suggests that they belonged to a cist grave.

Bibliography: Waterhouse and Hope Simpson 1961: 116-117; Demakopoulou 1982: 112-113.

23. Lagio (S23)

Period of occupation: EH, LH III.

Description*:* Sherds indicate settlements at the site during the EH and LH III periods.

Bibliography: Waterhouse and Hope Simpson 1960: 105.

24. Lefkas (S24)

Period of occupation*:* EH, MH, LH III.

Description*:* Survey of the region uncovered a potential BA settlement at summit known as Panayiotis. The sherds were dated to the EH, MH and LH III, with the latter being the most prominent. Eight fragments of *Lapis Lacedaemonius* and a Mycenaean figurine were also found.

Bibliography*:* Waterhouse and Hope Simpson 1960: 95-97.

25. Aghios Stephanos (S25)

Period of occupation**:** EH to LH IIIC Early.

Description**:** Excavations at the site of Aghios Stephanos have demonstrated that the site was occupied from the EH to the LH IIIC periods. There were, however, brief periods of abandonment during EH III and between the end of LH IIIA1 and the LH IIIB2 period.

During the LH IIIA1, occupation was concentrated on the south slope of the hill. One of the main buildings from this period is the courtyard and corridor structure within trenches Beta. Regrettably, information from the remaining structures at Aghios Stephanos is limited due to their poor state of preservation. For instance, to the west of the courtyard, only fragments of five walls survive. A floor surface was identified within these walls, indicating that they formed a room during the LH IIIA1 period.

The remaining identifiable structures belong to the LH IIIC period. Structure Lambda VI is located in trenches Lambda, and consists of six walls which formed at least three rooms (1, 2 and 4). Both rooms 2 and 4 had extensive floors of beaten earth and stone slabs. A considerable number of LH IIIC Early pottery was found on the surface of these floors. To the east of Structure Lambda VI, another building, on a different axis (NW-SE), was unearthed. In its interior, a pit was found containing four human skulls.

The remaining structures from the LH IIIC Early period, Structures Zeta, Epsilon I and II were located to the east of the buildings described above. Unfortunately, their preservation is poor, and only two to three small walls survive. These LH IIIC Early structures are the latest evidence of occupation at Aghios Stephanos.

26. Skalas (S26)

Period of occupation: LH III

***Description*:** On a low knoll, between two canalised streams, is the chapel of Aghios Nikolaos. LH III sherds were identified during survey, mostly from the LH IIIB period. Amongst the recognizable shapes were kylikes of 'Zygouries' type, bowls, a stirrup jar and a trumpet-mouthed pitcher. According to Waterhouse and Hope Simpson, this site is unlikely to have ever been of any great extent or importance.

***Bibliography*:** Waterhouse and Hope Simpson 1960: 94-95.

27. Pirgakia, Psilisi Skalas (S27)

Period of occupation: PG and G.

Description: During a small excavation at the plot of Mr. Ghkini, a pithos burial from the Geometric period was found containing a cup, a bronze pin and ring. The layers cut by the grave were rich in PG pottery. More sherds dated to the PG and G were discovered on the hill of Pigarkia, to the SW of Peristeri.

Bibliography*:* Zavvou and Themos 2006: 187; Themos 2007: 462-463; Zavvou 2012b: 254.

28. Xeronisi (S28)

Period of occupation: EH, MH and LH IIIA - IIIC.

Description**:** Sherds dating to the EH, MH and LH III periods were identified during a survey. The site is now largely ploughed away.

Bibliography*:* Waterhouse and Hope Simpson 1960: 95; Demakopoulou 1982: 111.

29. Peristeri, Tsasi (S29)

Period of occupation: LH IIA - Submycenaean

Description*:* The site of Peristeri is located in the Helos plain valley, where at least five chamber tombs have been found cut into the Solakos hillock. Little information is available from the excavation of these structures. A number of ceramic vessels are reported to originate from their excavation, including a LH IIIA2 narrow-necked jug and a LH IIIC Middle lekythos, as well as a small jug and a large necked-amphora, dated to the SubMycenaean period. The burial also contained a ring on the skeletons right hand, three fragmentary pins (near the shoulders). In Tomb 5, three bronze pins were associated with a burial, which can be dated to the Late Postpalatial and EIA (Kilian-Dirlmeier type A).

30. Vlachioti (S30)

Period of occupation*:* EH, LH III, Hellenistic.

Description: Sherds from the EH, LH III and Hellenistic period were collected from the area around the village of Vlachioti.

Bibliography**:** Waterhouse and Simpson 1960: 92.

31. Asteri, Karousi (S31)

Period of occupation: Neolithic-LH IIIC, PG-Hellenistic.

Description**:** Finds from the area indicate occupation through the Neolithic to the LH IIIC period and from the PG to the Hellenistic period.

Bibliography**:** Hood 1959-1960: 9; Waterhouse and Hope Simpson 1960: 89; Demakopoulou 1982: 106; Themos 2007: 458; Morgan 2007-2008: 36.

32. Aghios Strategos (S32)

***Period of occupation*:** EH - LH III.

***Description*:** Sherds from the EH, MH and LH II to LH III period were discovered in the area during survey.

***Bibliography*:** Waterhouse and Hope Simpson 1960: 87.

33. Elitsa (S33)

Period of occupation: Mycenaean.

***Description*:** There are reports of a very small and poorly built tomb from the Mycenaean period.

***Bibliography*:** Waterhouse and Hope Simpson 1960: 89.

34. Apidia (S34)

***Period of occupation*:** Neolithic, EH, MH, LH II, LH III, PG, Classical.

***Description*:** Survey revealed a number of sherds from the Neolithic to the MH. LH III sherds are well represented, including those dated to the LH IIIB2 and LH IIIC Early. At least one sherd from the Protogeometric was recovered.

Bibliography: Waterhouse and Hope Simpson 1960: 86; Demakopoulou 1982: 109.

35. Gangania (S35)

Period of occupation: EH – LH III.

***Description*:** A large number of sherds ranging from the EH to the LH III period were found, as well as two plundered chamber tombs. The settlement associated to the tombs was probably located on the upper slopes of the hill, as evidenced by much worn LH III sherds.

Bibliography: Waterhouse and Hope Simpson 1961: 139; Themos 2014a: 306; Gallou 2020: 63.

Maleas Peninsula

36. Anemomylo (S36)

***Period of occupation*:** EH to Hellenistic.

***Description*:** A quantity of coarse pottery was found dated to the EH and the LH III period. More recent surveys describe a larger variety of ceramics around the hill of the Byzantine Aghios Georgios church, including examples from 'prehistory' to the Hellenistic period

***Bibliography*:** Waterhouse and Hope Simpson 1961: 138; Themos 2007: 463.

37. Sykia (S37)

Period of occupation: LH IIIA - LH IIIC Early.

***Description*:** The chamber tombs of Sykia are located approximately 2.5km NW from Epidaurus Limera. Four chamber tombs were excavated in the area from 1973 to 1998. All four chambers contained pit graves cut into their floor surfaces. Most graves contained more than one individual, but pits with secondary graves were also found. A feature common to all pit graves was the use of stone plaques as a cover. Grave goods were similar as well, including pottery, of which jars, alabastra, cups

and stirrup jars were the most common, as well as weapons such as knives and swords. It is interesting to note that in two chambers children and adults were buried together in the same pits.

***Bibliography*:** Zavvou 2002: 215; Gallou 2008: 297; Gallou 2020: 32-35.

38. Epidaurus Limera (S38)

Period of occupation: MH III/LH I – Submycenaean.

***Description*:** At least ten chamber tombs have been identified in the area of Epidaurus Limera near Monemvasia, distributed in three clusters (Palaiokastro, Aghia Triadha, Vamvakia). Excavations suggest they were in use during the MH III/LH I and the Submycenaean periods. In general, the chambers are of an elliptical shape, their dromoi are narrow, short, steep and occasionally stepped. And burials were dug into the chambers floors and covered with stone slabs. However, chamber tombs at the Aghia Triadha, Vamvaki and Sternes clusters feature a side chamber directly next to the entrance.

39. Daimonia (S39)

***Period of occupation*:** MH, LH and Hellenistic.

***Description*:** The site was identified by a scatter of sherds from the MH and LH periods, including LH I and LH IIIB.

Bibliography: Waterhouse and Hope Simpson 1961: 141.

40. Aghios Anargyroi, Stena (S40)

***Period of occupation*:** LH IIA – LH IIIB2.

Description: A small Mycenaean settlement located by survey. Finds such as kylikes, deep bowls, a pear-shaped rhyton and a large closed vessel were found in the area, dated to a period between LH IIA and LH IIIB2. Three plundered chamber tombs were also found in the area, cut into the east bank of the river.

Bibliography: Waterhouse and Hope Simpson 1961: 141; Gallou 2008: 296.

41. Kontrafourianika (S41)

Period of occupation: Mycenaean

Description: A large number of chamber tombs have been reported to be located to the east of the Church of Theotokou in Xenofodianika, in Aghios Apostoli.

***Bibliography*:** Zavvou 2012d: 290.

42. Manolarianika (S42)

Period of occupation: Mycenaean.

***Description**:* At least four plundered chamber tombs with round burial chambers were identified in the area.

Bibliography: Gallou 2008: 296. 2020: 71-72.

43. Megali Spelia (S43)

Period of occupation: Mycenaean.

Description*:* A cluster of plundered chamber tombs with oval burial chambers were uncovered in the south-west boundary of the modern hamlet of Megali Spelia.

Bibliography: Gallou 2008: 296, 2020: 72.

44. Aghios Georgios (S44)

Period of occupation: LH III.

Description**:** Four chamber tombs with stepped dromoi were first identified during the construction of the road to Stena during the 1950s. Two of the chambers were excavated by Christou, but no skeletal remains were found. Unfortunately, none are visible today.

45. Pavlopetri (S45)

Period of occupation**:** FN, EH II to LH IIIB, PG, Classical to Byzantine.

Description**:** The site of Pavlopetri is located just off the Punta shore, opposite the island of Elaphonisis, under approximately 2 to 3m below sea level. Ongoing investigations have revealed a total of 4 ha of intact stone building foundations, monumental structures, courtyards, streets, cist graves and rock-cut tombs. Furthermore, occupation can now be shown to had been uninterrupted from the mid-4th millennium to the EIA.

46. Adiakopos (S46)

Period of occupation: Mycenaean.

Description: In the area of Giareni, a number of rectangular and oval chamber tombs were identified along the sides of an ancient road towards the north-west. The nearest Mycenaean settlement is possibly located at Giareni.

Bibliography: Arvanitis 1993: 213; Gallou 2008: 297, 2020: 79.

47. Kamari (S47)

Period of occupation: LH IIIA-LH IIIB (?)

Description: Two plundered chamber tombs were found in Kamari, near Aghios Konstantinos, one of which has a rectangular shape. A possible associated settlement has been identified by Gallou c. 750m south of the chamber tombs.

Bibliography: Gallou 2008: 297, 2020: 79.

48. Anemomylos, Kostatinakeika (S49)

Period of occupation: Mycenaean.

Description: Two plundered chamber tombs equipped with oval chambers were discovered in the western suburbs of Neapolis Voion. Two more possible tombs might be concealed in the area.

Bibliography: Gallou 2008: 297, 2020: 79.

49. Avlospilo, Neapoli (S49)

Period of occupation: Mycenaean

Description*:* Clusters of Mycenaean chamber tombs were found in the low hill at Avlospilo and its surroundings. One of them features an oval burial chamber and a short, steep, stepped dromos. Furthermore, the area is strewn with EH, MH and LH sherds.

Bibliography*:* Zavvou 2002: 215; Gallou 2008: 297, 2020: 82.

50. Palaiokastro (S50)

Period of occupation: EH – LH.

Description*:* A large number of EBA to LBA sherds were identified during a survey in this small peninsula, south of Neapolis

Bibliography*:* Gallou 2008: 297.

51. Boza (Asopos) (S51)

Period of occupation: LH IIIA – LH IIIC, PG to G.

Description: A number of Mycenaean sherds were found, including LH IIIB1 kylikes, as well as a fragment of a LH IIIC skyphos and a figurine dated to the LH IIIA-LH IIIB period. On the south and south-west slopes of the peninsula, Protogeometric and Geometric sherds were also identified.

Bibliography: Morgan 2007-2008: 37; Zavvou 2007: 418-19.

52. Las: Kasteli (S52)

Period of occupation: EH and Mycenaean

Description: A number of sherds were identified in the area as belonging to the EH and the LH IIIB. More recently, Gallou identified during her survey pottery from the EBA and LBA periods.

Bibliography: Varouxa-Xristodoulopoulou 1966: 14; ArchDelt 56 (2001): 216; Zavvou 2002: 216, 2012e: 126; Gallou 2008: 298.

53. Paizoulia (S53)

Period of occupation: EH, MH, LH II-III

Description: Sherds from the EH, MH and LH II-III were identified during a survey on the southern slopes of the Paizoulia hill, north of the road from Gythion to Trinasa.

Bibliography*:* Waterhouse and Hope Simpson 1960: 105.

54. Finiki (S54)

Period of occupation: LH I – LH II, LH IIIC Late.

Description: Sherds from the LH I to the LH II and the LH IIIC Late period were found to the west of Sykia in Finiki.

Bibliography: Demakopoulou 1982: 110.

55. Angelona (S55)

Period of occupation: LH IIIB.

Description: Mycenaean cemetery of chamber tombs. One large, rectangular, chamber was excavated and found to contain two skeletons and one intact unpainted jug. Cist graves were found cutting the surface of the chamber, covered by stone plaques. One of the graves contained three LH IIIB vessels (an alabastron, a basin and a jug).

Bibliography: Spyropoulos 1988b: 129-131; Gallou 2020: 35-37.

Mount Taygetos

56. Arkines (S56)

Period of occupation: LH III

Description: Two small tholoi were excavated by Tsountas and Soteriades and most likely date to the LH IIIA period. A settlement is located to the east of Tsountas' tholos, evinced by a number of LH III kylikes, pithoi and large bowls.

Bibliography: Tsountas 1890: 22; Soteriades 1910: 277-278; Waterhouse and Hope Simpson 1961: 128; Spyropoulos 1989: 111-112; Gallou 2020: 14-16.

East of Mount Parnon

57. Analipsis (Vourvoura) (S57)

Period of occupation: LH IIA, LH IIB, LH IIIA2 - LH IIIB1.

Description: On a hill located approximately 4km west of the village of Vourvoura, a Mycenaean settlement and a cluster of tholoi were discovered during excavations in the 1950s. There is no

information regarding the settlement, but at least nine tholoi were found. The largest had a diameter of 8.65m and a height it 4.50m. Unfortunately, the tholoi had been robbed and only scattered remains were found, including boar's tusks from a helmet, two fragmentary ivory combs, bronze and stone arrowheads, three amber beads and small pieces of gold and silver. Four palatial style jars from the LH IIA period were also found, as well as a ring-handled cup and a rounded alabastron from the LH IIB period. Two pit burials were excavated, that of an adult and a child.

58. Vaskina (S58)

Period of occupation: LH IIIA – LH IIIB

Description: A Mycenaean tomb was identified by farmers in 1936. It was built with large field-stones and it is reported to have contained 'many skeletons', as well as a kylix, a stirrup jar, a small jug and a storage jar.

Bibliography: Waterhouse and Hope Simpson 1961: 131.

59. Astros (S59)

Period of occupation: MH to PG.

Description: A MH and PG cemetery were found on the west side of the acropolis. Pottery from the MH and LH periods were found in the vicinity.

Bibliography: Waterhouse and Hope Simpson 1961: 131.

60. Leonidi Plaka (S60)

Period of occupation: LH III, H.

Description*:* Terrace walls and disturbed graves were identified, together with a few LH III and Hellenistic sherds.

Bibliography: Waterhouse and Hope Simpson 1961: 131.

61. Palaiochori, Leonidi (S61)

Period of occupation: LH I-IIA, LH IIIA.

Description: An excavation from the beginning of the 19th century reported a group of vases supposedly from tombs dated to LH I/IIA to LH IIIA.

Bibliography: Waterhouse and Hope Simpson 1961: 132.

North-west Mani and East Taygetos

62. Belmina (S62)

Period of occupation: Mycenaean.

Description: A few sherds from the Mycenaean period were found, including kylikes and deep bowls.

Bibliography: Waterhouse and Hope Simpson 1961: 125.

63. Pellana (S63)

Period of occupation: EH to Medieval.

Description*:* In total, eight chamber tombs have been excavated in the area. The first two are located approximately 700m to the north of Palaiokastro, on a small hillock named Spilies or Pelekiti. The largest one, named the 'Great Tomb' (also known as Chamber 2), had a diameter of approximately 10m. Its dromos was orientated SW to NE and it had a length of 12.70m. It is clear that the tomb had been robbed in the past, as no burials were found within the chamber, but scattered vessels indicate that the chamber tomb was in use during LH IIA to the LH IIIA1. The remaining chamber tombs in the area were smaller, but similarly constructed with a 'beehive' ceiling.

Lastly, the last three chamber tombs to have been excavated in the area were presented during a conference in 2019 at the Netherlands Institute at Athens by L. Souchleris. The tombs are located in the area of Agios Ioannis, to the east of the 71 motorway, approximately 1.60km from the village of Pellana. Within the floor surface of Chamber 6 two pit burials were found, each containing one skeleton. Both skeletons were in a supine position, orientated towards EW. At the feet of the northern burial, a LH IIIA2 beaked jug, decorated with large birds on each side and flowers in between, accompanied the deceased. A rounded cup from the same period was also found at the left side of the skeleton, next to its hip. Within the fill of the chamber, above the burials, a LH IIIA2 kylix was found, as well as a skull and other bones from a dog. The burials within chambers 7 and 8 still have not been published, but from the information presented it is possible to suggest that the latter was in use from the LH IIIA to the LH IIIC Early period. The vessels found within Chamber 8, on the other hand, point to a period between LH IIIA2 and LH IIIB.

64. Aghios Konstantinou Logkanikou (S64)

Period of occupation: MH III, Geometric

Description: A cemetery was excavated and found to contain at least one pithos burial dated to the Geometric period. The pithos contained the remains of one individual in a crouched position with two bronze pins, two clay beads and two bronze pins. Other burials in the area could be dated to an earlier date, since the majority of the pottery found is dated to the MH III period.

K49	S05	-	Arcs of concentric circles, vertical section of black coating. Interior: monochrome.	PG	Coulson 1985: 79, no. 310, pl. 14a.
K50	S01 (Artemis Orthia)	-	Alternating black and reserved bands. Below, arcs of concentric circles. Interior: monochrome.	PG	Coulson 1985: 79, no. 312, pl. 8b.
K51	S01 (Athena Chalkioikos)	-	Arcs of two tangential concentric circles, below, alternating black and reserved bands. Interior: monochrome.	PG	Coulson 1985: 79, no. 313, pl. 15e.
K52	S01	-	Cross-hatching and oblique lines (cross?) in metopal panel with five verticals forming triglyph, below, groove. Interior: monochrome.	PG	Coulson 1985: 79-80, no. 314, pl. 13i.
K53	S01 (Acropolis)	-	Reserved zone on the rim, below, decorative zone of cross-hatching.	PG	Margreiter 1988, no. 10, pl. 2.
K54	Unknown	-	Black band on rim, below, concentric circles in between vertical lines.	PG	Margreiter 1988, no. 11a, pl. 2.
K55	S01 (Artemis Orthia)	-	Black band on rim, followed by reserved band and decorative zone of concentric circles flanked by cross-hatching panels. Below, black coating.	PG	Margreiter 1988, no. 11b, pl. 2.
K56	Tegea	D. rim: 24	Monochrome. Interior: large reserved area followed by black coating.	PG	Voyatzis 2014a: 238, no. 86, fig. 20, pl. 9.
K57	S05	-	Cross-hatching below lip. Below, panel of cross-hatching and vertical lines.	EG/PG	Margreiter 1988, no. 64, pl. 7.
K58	S05	-	Cross-hatching below lip and vertical lines on top of rim. Possible line of leaf-shaped lozenges in a vertical position.	EG/PG	Margreiter 1988, no. 66, pl. 7.

K59	S05	-	Black band on rim, followed by cross-hatching. Below, fragments of cross-hatching panel and vertical lines.	EG/PG	Margreiter 1988, no. 68, pl. 7.
K60	S05	-	Reserved band on rim, followed by decorative zone of piled/cross-hatched triangle in metopal panel.	EG	Margreiter 1988, no. 60, pl. 6.
K61	S05	-	Band of cross-hatching on rim. Below, concentric circle and panel of cross-hatching (?).	EG	Margreiter 1988, no. 61, pl. 6.
K62	S05	-	Black band on rim, below, cross-hatching panel flanked by concentric circles.	EG	Margreiter 1988, no. 62, pl. 6.
K63	Unknown	-	Decorative zone with cross-hatched triangle in metopal panel.	EG	Margreiter 1988, no. 63, pl. 6.
K64	S01 (Artemis Orthia)	-	Cross-hatching below lip. Below, black band and decorative zone of cross-hatching triangle and vertical lines.	EG	Margreiter 1988, no. 65, pl. 7.
K65	S01 (Athena Chalkioikos)	-	Cross-hatching below lip and zigzag on top of rim.	EG	Margreiter 1988, no. 67, pl. 7.
K66	S01 (Acropolis)	-	Cross-hatching below lip.	EG	Margreiter 1988, no. 69, pl. 7.
K67	S05	-	Black band on rim, below, decorative zone with a concentric circle, vertical lines and panel of cross-hatching.	EG	Margreiter 1988, no. 70, pl. 7.
K68	Unknown	-	Panel of cross-hatching above horizontal line and unknown motif.	EG	Margreiter 1988, no. 71, pl. 7.
K69	S05	-	Black band on rim, below, decorative zone with concentric circle and panel of cross-hatching.	EG	Margreiter 1988, no. 72, pl. 7.
K70	S01 (Artemis Orthia)	-	Black band on rim, followed by decorative zone with concentric circles.	EG	Margreiter 1988, no. 73, pl. 7.
K71	S05	-	Decorative zone with cross-hatching panel vertical lines and unidentified motif.	EG	Margreiter 1988, no. 74, pl. 7.
K72	Unknown	-	Concentric circles.	EG	Margreiter 1988, no. 77, pl. 8.

K73	Unknown	-	Concentric circles.	EG	Margreiter 1988, no. 78, pl. 8.
K74	S01 (Artemis Orthia)	-	Decorative zone below lip with cross-hatched triangle and possible panel of cross-hatching.	EG	Margreiter 1988, no. 79, pl. 8.
K75	S05	-	Unidentified motif with cross-hatching above zone of dark background.	EG	Margreiter 1988, no. 81, pl. 8.
K76	S05	-	Decorative zone with concentric circle and cross-hatched triangle above horizontal lines.	EG	Margreiter 1988, no. 82, fig. 4.18.
K77	S05	-	Decorative zone with panels of cross-hatching above dark background.	EG	Margreiter 1988, no. 83, fig. 4.17.
K78	S01 (Acropolis)	-	Row of concentric circles.	MG	Margreiter 1988, no. 127, pl. 11.
K79	Unknown	-	Row of concentric circles above horizontal lines.	MG	Margreiter 1988, no. 128, pl. 11.
K80	S01 (Athena Chalkiokos)	-	Row of concentric circles above horizontal lines.	MG	Margreiter 1988, no. 129, pl. 11.
K81	S01 (Acropolis)	-	Black band on rim, below, row of concentric circles.	MG	Margreiter 1988, no. 130, pl. 11.
K82	Unknown	-	Row of concentric circles above horizontal lines.	MG	Margreiter 1988, no. 131, pl. 11.
K83	S01 (Acropolis)	-	Horizontal lines above concentric circles.	MG	Margreiter 1988, no. 132, pl. 11.
K84	Unknown	-	Decorative zone with oblique, overlapping, lines. Below, horizontal lines.	MG	Margreiter 1988, no. 133, pl. 11.
K85	S01 (Athena Chalkioikos)	-	Concentric circles and star.	MG	Margreiter 1988, no. 134, pl. 11.
K86	S01 (Acropolis)	-	Panel with cross-hatched diamond over a cross-hatched triangle (?). Fragment of star is seen to the right of the panel.	MG	Margreiter 1988, no. 136, pl. 12.
K87	S01 (Artemis Orthia)	-	Fragment of cross-hatched diamond.	MG	Margreiter 1988, no. 138, pl. 12.

K88	S01 (Artemis Orthia)	-	Fragment of diamond decorated with panels with cross-hatching.	MG	Margreiter 1988, no. 139, pl. 12.
K89	S01 (Athena Chalkioikos)	-	Decorative zone of concentric circles divided by four horizontal lines. Above, small, vertical lines between horizontal lines.	LG	Margreiter 1988, no. 205, pl. 18.
K90	S01 (Athena Chalkioikos)	-	Row of concentric circles, with a star between them. Above, horizontal line and pattern of vertical lines and crosses.	LG	Margreiter 1988, no. 206, pl. 18.
K91	Unknown	-	Panel with cross-hatching, next to decorative zone with concentric circles.	LG	Margreiter 1988, no. 207, pl. 18.
K92	S05	-	Row of lozenges above three horizontal lines. Followed by concentric circle.	LG	Margreiter 1988, no. 208, pl. 18.
K93	S01 (Athena Chalkioikos)	-	Cross-hatched cross within a panel, below, horizontal lines followed by a decorative zone with a row of concentric circles. Below, horizontal lines and black monochromatic zone.	LG	Margreiter 1988, no. 209, pl. 18.
K94	S01 (Acropolis)	-	Decorative zone with large and small concentric circles above horizontal lines.	LG	Margreiter 1988, no. 210, pl. 19.
K95	S01 (Acropolis)	-	Small fragment with concentric circles and a star between them.	LG	Margreiter 1988, no. 211, pl. 19.
K96	S05	-	Cross-hatched cross within a circle. To the left, vertical lines and panel with horizontal zigzag lines.	LG	Margreiter 1988, no. 212, pl. 19.
K97	S01	-	Rows of cross-hatched triangles, with vertical lines to the left.	LG	Margreiter 1988, no. 213, pl. 19.
K98	S01 (Acropolis)	-	Concentric circle with vertical lines and a panel with horizontal zigzag lines to the right.	LG	Margreiter 1988, no. 214, pl. 19.
K99	S01 (Acropolis)	-	Concentric circles above horizontal lines.	LG	Margreiter 1988, no. 215, pl. 19.
K100	S01 (Acropolis)	-	Stepped, hatched, meanders above horizontal lines. Below, horizontal zigzag lines and horizontal lines.	LG	Margreiter 1988, no. 216, pl. 19.

K101	S05	-	Fragment of square, with a hatched border, with pilled triangles (?) within. Possible figure to the right and stars.	LG	Margreiter 1988, no. 217, pl. 19.
K102	S01 (Acropolis)	-	Hatched zizgags and vertical lines.	LG	Margreiter 1988, no. 218, pl. 19.
K103	S05	-	Handle decorated with cross-hatching and vertical lines.	LG	Margreiter 1988, no. 219, pl. 19.
K104	S05	-	Zigzag on rim, followed by leaf-shaped lozenges. Below, panels decorated with stepped, hatched, meanders and horse figure. Followed by another row of leaf-shaped lozenges and horizontal zigzags.	LG	Margreiter 1988, no. 220, pl. 19.
K105	S05	-	Panel of horizontal, hatched, zigzags next to a human figure with arrows (?). Below, horizontal lines and row of leaf-shaped lozenges.	LG	Margreiter 1988, no. 221, pl. 19.
K106	S01 (Acropolis)	-	Stepped, hatched meanders.	LG	Margreiter 1988, no. 222, pl. 20.
K107	Unknown	-	Black band on rim, followed by a row of small vertical lines.	LG	Margreiter 1988, no. 223, pl. 20.
K108	Unknown	-	Black band on rim. Below, rows of piled and cross-hatched triangles.	LG	Margreiter 1988, no. 224, pl. 20.
K109	S05	-	Hatched quatrefoil motif within a panel. Between leaves, hatched triangles. Three vertical lines and a horizontal zigzag line can be seen to the left.	LG	Margreiter 1988, no. 225, pl. 20.
K110	Unknown	-	Human figure (?)	LG	Margreiter 1988, no. 226, pl. 20.
K111	S01 (Acropolis)	-	Quatrefoil with piled triangles between the leaves.	LG	Margreiter 1988, no. 227, pl. 20.
K112	S05	-	Gridded meander (?) above horizontal lines.	LG	Margreiter 1988, no. 228, pl. 20.
K113	S05	-	Bird in panel with piled triangles below its body.	LG	Margreiter 1988, no. 229, pl. 20.

K114	S05	-	Horizontal lines followed by band of groups of vertical lines. Below, horizontal lines and chain of leaf-shaped lozenges.	LG	Margreiter 1988, no. 230, pl. 20.
K115	S05	-	Row of birds followed by horizontal lines. Below, vertical zigzag, followed by horizontal lines and oblique zigzags.	LG	Margreiter 1988, no. 231, pl. 20.
K116	S05	-	Quatrefoil with cross-hatched triangles in between the leaves. Below, horizontal lines and panel with three birds.	LG	Margreiter 1988, no. 232, pl. 20.
K117	S01 (Athena Chalkioikos)	-	Row of concentric circles above dark band.	LG	Margreiter 1988, no. 233, pl. 20.
K118	S01 (Athena Chalkioikos)	-	Fine banding.	LG	Margreiter 1988, no. 235, pl. 20.
K119	S01 (Heroon)	-	Triglyph of metopal panel with vertical zigzag between two verticals to left and right. Metope decoration of solid, black diamonds (?). Below, zigzag framed by alternating black and reserved bands. Interior: monochrome.	LG	Coulson 1985: 79, no. 311, pl. 7f.
K120	S01 (Acropolis)	-	Panel of vertical chevrons flanked by concentric circles.	LG	Margreiter 1988, no. 80, pl. 8.
K121	S05	-	Panel with legs of two human figures in between panels of hatched horizontal zigzag lines. Below, black banding alternating with horizontal fine lines.	LG	Vlachou 2015: 120, fig. 5.

Cp54	S01 (Athena Chalkiokos)	-	Small zigzag line on rim, followed by horizontal lines and horizontal zigzags and star.	MG	Margreiter 1988: 147, no. 143, pl. 12.
Cp55	S01 (Athena Chalkioikos)	-	Horizontal banding, followed by horizontal zigzag and further horizontal banding.	LG	Margreiter 1988: 150, no. 236, pl. 21.
Cp56	S01	-	Horizontal banding, followed by horizontal zigzag, further horizontal banding and black coating	LG	Margreiter 1988: 150, no. 237, pl. 21.
Cp57	S01 (Artemis Orthia)	-	Horizontal line on rim, followed by black band and horizontal banding. Below, double wavy lines and further horizontal banding.	LG	Margreiter 1988: 150, no. 238, pl. 21.
Cp58	S01 (Acropolis)	-	Horizontal zigzag line followed by horizontal banding.	LG	Margreiter 1988: 150, no. 239, pl. 21.
Cp59	S05	-	Horizontal banding followed by row of cross-hatching diamonds.	LG	Margreiter 1988: 150, no. 240, pl. 21.

Cp60	S01 (Artemis Orthia)	-	Horizontal banding on upper and lower body. Row of lozenges on band in between.	LG	Margreiter 1988: 150, no. 241, pl. 21.
Cp61	S01 (Artemis Orthia)	-	Horizontal lines, followed by row of lozenges and more horizontal lines. Below, hatched meanders, horizontal lines, hatched zigzag and horizontal banding.	LG	Margreiter 1988: 150, no. 242, pl. 21.
Cp62	S01	-	Horizontal banding at the rim, followed by row of lozenges.	LG	Margreiter 1988: 150, no. 243, pl. 22.
Cp63	Unknown	-	Horizontal lines followed by hatched zigzag.	LG	Margreiter 1988: 150, no. 244, pl. 22.
Cp64	S01 (Athena Chalkioikos)	-	Unidentified motif, followed by horizontal lines and row of cross-hatched lozenges and dots.	LG	Margreiter 1988: 150, no. 245, pl. 22.
Cp65	S01 (Artemis Orthia)	-	Double line of hatched zigzags.	LG	Margreiter 1988: 150, no. 246, pl. 22.
Cp66	S01 (Artemis Orthia)	-	Panel of gridded meander above horizontal zigzag and horizontal lines.	LG	Margreiter 1988: 150, no. 247, pl. 22.
Cp67	S01 (Acropolis)	-	Horizontal line, row of lozenges, horizontal lines and vertical lines.	LG	Margreiter 1988: 150, no. 248, pl. 22.
Cp68	S01 (Artemis Orthia)	-	Horizontal lines above row do cross-hatched lozenges.	LG	Margreiter 1988: 151, no. 249, pl. 22.
Cp69	S01 (Artemis Orthia)	-	Horizontal lines above panels of horizontal zigzags (left) and vertical lines (right). Below, horizontal lines.	LG	Margreiter 1988: 151, no. 250, pl. 22.
Cp70	S01 (Heroon)	-	Horizontal lines, followed by a row of lozenges and horizontal lines, horizontal zigzag and further horizontal lines. Below, band of groups of vertical lines and horizontal lines.	LG	Margreiter 1988: 151, no. 251, pl. 22.

Cp71	S01 (Acropolis)	-	Horizontal banding, followed by row of lozenges and horizontal lines. Below, panels with vertical lines and unknown hatched motif.	LG	Margreiter 1988: 151, no. 252, pl. 22.
Cp72	S01 (Athena Chalkioikos)	-	Horizontal lines, followed by row of lozenges and more horizontal lines. Zone of hatched meanders and vertical lines on the handle zone. Below, horizontal banding.	LG	Margreiter 1988: 151, no. 253, pl. 22.
Cp73	S01 (Artemis Orthia)	-	Horizontal banding and horizontal lines on handle.	LG	Margreiter 1988: 151, no. 254, pl. 23.
Cp74	S01 (Acropolis)	-	Horizontal banding, white zigzag on black band.	LG	Margreiter 1988: 151, no. 255, pl. 23.
Cp73	S01	-	Horizontal lines followed by two rows of leaf-shaped lozenges.	LG	Margreiter 1988: 151, no. 256, pl. 23.
Cp74	S01 (Artemis Orthia)	-	Horizontal zigzags, followed by horizontal lines, hatched meander and horizontal lines.	LG	Margreiter 1988: 151, no. 257, pl. 23.
Cp75	S01 (Artemis Orthia)	-	Horizontal lines followed by hatched meander (?)	LG	Margreiter 1988: 151, no. 258, pl. 23.
Cp76	S01 (Artemis Orthia)	-	Horizontal banding, with white dots over black band.	LG	Margreiter 1988: 151, no. 259, pl. 23.
Cp77	S01 (Artemis Orthia)	-	Hatched meander above horizontal lines and row of lozenges.	LG	Margreiter 1988: 151, no. 260, pl. 23.
Cp78	S03	-	Small vertical lines above horizontal banding and panels with vertical lines and unidentified motif.	LG	Margreiter 1988: 151, no. 261, pl. 23.
Cp79	S01 (Acropolis)	-	Fragments of meanders.	LG	Margreiter 1988: 151, no. 262, pl. 23.

Cp81	S01 (Artemis Orthia)	-	Row of lozenges, below horizontal lines and row of birds.	LG	Margreiter 1988: 151, no. 264, pl. 23.
Cp82	S01 (Artemis Orthia)	-	Quatrefoil in between horizontal lines.	LG	Margreiter 1988: 151, no. 265, pl. 23.
Cp83	S01 (Artemis Orthia)	-	Handle zone within panel. To the right, cross-hatching panel.	LG	Margreiter 1988: 151, no. 266, pl. 23.
Cp84	S05	-	Panel with horizontal zigzags to the left and quatrefoil to the left. Below, horizontal lines.	LG	Margreiter 1988: 151, no. 267, pl. 23.
Cp85	S01 (Artemis Orthia)	-	Panels with row of lozenges above cross-hatched quatrefoil motif.	LG	Margreiter 1988: 151, no. 268, pl. 23.
Cp86	S01 (Acropolis)	-	Column of lozenges within vertical zigzags in a panel.	LG	Margreiter 1988: 151, no. 269, pl. 23.
Cp87	S01 (Athena Chalkioikos)	-	Band of vertical zigzags followed by horizontal banding.	LG	Margreiter 1988: 151, no. 270, pl. 23.
Cp88	S05	-	Row of leaf-shaped lozenges. Below, horizontal banding and reserved diamonds (?)	LG	Margreiter 1988: 151, no. 271, pl. 23.
Cp89	S01 (Artemis Orthia)	-	Horizontal banding.	LG	Margreiter 1988: 151, no. 272, pl. 23.
Cp90	S05	-	Bands with cross-hatched lozenges and triangles, chevrons and a row of diamonds. Horizontal banding at the lower body.	LG	Tsountas 1892, pl 4.1; Margreiter 1988: 151, no. 273, fig.7.33.
Cp91	S05	-	Horizontal zigzag, followed by horizontal lines. Below, decorative panel with cross (?) and stars.	LG	Margreiter 1988: 151, no. 274, pl. 24.
Cp92	S05	-	Panel with quatrefoil within cross-hatching.	LG	Margreiter 1988: 151, no. 275, pl. 24.

Cp93	Unknown	-	Two rows of cross-hatched diamonds.	LG	Margreiter 1988: 151, no. 276, pl. 24.
Cp94	S05	-	Panels with small vertical lines and bird. Larger panel to the right with unknown decoration.	LG	Margreiter 1988: 151, no. 277, pl. 24.
Cp95	S05	-	Vertical lines above panel with head of bird.	LG	Margreiter 1988: 151, no. 278, pl. 24.
Cp96	S01 (Athena Chalkioikos)	-	Panel with horizontal zigzag lines above horizontal banding.	LG	Margreiter 1988: 151, no. 279, pl. 24.
Cp97	S01 (Artemis Orthia)	-	Horizontal lines above hatched horizontal zigzags.	LG	Margreiter 1988: 151, no. 280, pl. 24.
Cp98	S05	-	Row of birds in between horizontal lines.	LG	Margreiter 1988: 151, no. 281, pl. 24.
Cp99	S05	-	Horizontal lines followed by horses and diamonds as filling.	LG	Margreiter 1988: 151, no. 282, pl. 24.
Cp100	S01 (Artemis Orthia)	-	Vertical lines, followed by horizontal lines and reserved diamonds (?).	LG	Margreiter 1988: 151, no. 283, pl. 24.
Cp101	S05	-	Row of birds below horizontal lines.	LG	Margreiter 1988: 151, no. 284, pl. 24.
Cp102	S01 (Artemis Orthia)	-	Small vertical lines above panel with bird and diamond.	LG	Margreiter 1988: 151, no. 285, pl. 24.
Cp103	S01 (Athena Chalkioikos)	-	Panels with horizontal zigzags, meander, quatrefoil and stars.	LG	Margreiter 1988: 151, no. 286, pl. 24.
Cp104	S01 (Artemis Orthia)	-	Row of birds with diamonds.	LG	Margreiter 1988: 151, no. 287, pl. 24.
Cp105	S01 (Artemis Orthia)	-	Panel with horizontal zigzags above horizontal banding.	LG	Margreiter 1988: 151, no. 288, pl. 24.
Cp106	S01 (Artemis Orthia)	-	Row of diamonds in between horizontal banding.	LG	Margreiter 1988: 151, no. 289, pl. 24.

Cp107	S01 (Artemis Orthia)	-	Decorative zone with human figures above horizontal lines.	LG	Margreiter 1988: 151, no. 290, pl. 25.
Cp108	S01 (Artemis Orthia)	-	Human figures above horizontal lines. Below, row of diamonds and horizontal lines.	LG	Margreiter 1988: 151, no. 291, pl. 25.
Cp109	S01 (Athena Chalkioikos)	-	Fragment of upper body of human figure.	LG	Margreiter 1988: 151, no. 292, pl. 25.
Cp110	S01 (Artemis Orthia)	-	Fragment with human figure.	LG	Margreiter 1988: 151, no. 293, pl. 25.
Cp111	S01 (Artemis Orthia)	-	Horizontal lines above two human figures.	LG	Margreiter 1988: 151, no. 294, pl. 25.
Cp112	S01 (Artemis Orthia)	-	Fragment of lower body of human figure above horizontal lines.	LG	Margreiter 1988: 151, no. 295, pl. 25.
Cp113	S01 (Acropolis)	-	Fragment of lower body of human figure.	LG	Margreiter 1988: 151, no. 296, pl. 25.
Cp114	S01 (Artemis Orthia)	-	Row of horses.	LG	Margreiter 1988: 151, no. 297, pl. 25.
Cp115	S01 (Athena Chalkioikos)	-	Lower body of horse (?) and star, above horizontal lines.	LG	Margreiter 1988: 151, no. 298, pl. 25.
Cp116	S01 (Athena Chalkioikos)	-	Legs of human figures above banding of inverted cross-hatched triangles and horizontal lines.	LG	Margreiter 1988: 151, no. 299, pl. 25.
Cp117	S01 (Artemis Orthia)	-	Main decorative panel of horses and human figure. Below, horizontal lines and row of diamonds (?).	LG	Margreiter 1988: 151, no. 300, pl. 25.

Cp118	S05	-	Top of cup has large band of male figures, lyres and small diamonds. Below, banding with rows of diamonds and horizontal lines.	LG	Tsountas 1892, pl. 4.2; Margreiter 1988: 151, no. 301, pl. 26.
Cp119	S05	-	Rim is decorated with groups of small vertical lines and horizontal lines. Below, panels with horizontal zigzags divided by vertical lines. Followed by row of birds, horizontal lines and final band with groups of vertical lines.	LG	Vlachou 2015: 118-119, no. AM318, fig. 4.
Cp120	S05	-	Top of rim is decorated with horizontal zigzag. Below, banding of inverted cross-hatched triangles throughout the body of the cup.	LG	Vlachou 2018: 109, fig. 4.9.
Cp121	S01	-	Upper part of cup has a row of birds. Below, horizontal lines and panels separated by vertical lines containing horizontal zigzag. Black banding on lower part of the body.	LG	Zavvou 2003: 160-63, pl. 71c.
Cp122	Volimidia	D. rim: 11 D. base: 9	Banded. Interior: monochrome with reserved band on inner rim.	LG	Coulson 1988: 56, fig. 4.
Cp123	S01 (Achilleion)		Group of thin horizontal lines on the rim followed by a frieze with groups of short vertical lines. Interior: monochrome, except for two reserved lines on the rim.	LG	Stibbe 1994: 58, no. A2, fig. 167, 2002: 212, figs. 4 and 5
Cp124	S01 (Achilleion)		Short vertical lines on rim, followed by three thin bands and a frieze containing a group of vertical lines and horizontal zigzags.	LG	Stibbe 2002: 212, figs. 6 and 7.

Sk56	Carinated	S05	D. rim: 12	Cross-hatching from rim. Interior: monochrome	PG	Coulson 1985: 69, no. 56, fig. 2, pl. 12b.

Sk57	Carinated	S05	D. rim: 18	Black band at rim, cross-hatching to groove. Main decorative zone of linked cross-hatched diamonds, framed above and below incised grooves. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 69, no. 57, fig. 3, pl. 7c.
Sk58	Carinated	S05	D. rim: 20	Black band at rim, cross-hatching on rim to incised groove. Below, main decorative zone of two vertical lines forming triglyph and possible cross-hatched triangle. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 69, no. 58, fig. 3, pl. 10c.
Sk59	Carinated	S05	D. rim: 18	Black band on lip, cross-hatching to incised groove. Below, main decorative zone of five vertical lines of triglyph and possible cross-hatched triangle. Interior: monochrome	PG	Coulson 1985: 69, no. 59, fig. 3, pl. 10b.
Sk60	Carinated	S05	D. rim: 16	Black band on lip, below, decoration of cross-hatched triangle in metopal panel; five vertical lines of triglyph. Interior: monochrome	PG	Coulson 1985: 69, no. 60, fig. 3, pl. 10b.
Sk61	Carinated	S05	D. rim: 18	Black band on lip, below, three vertical lines of triglyph in metopal panel. Interior: monochrome	PG	Coulson 1985: 69, no. 61, fig. 3, pl. 10b.
Sk62	Carinated	S05	D. rim: 16	Black band on lip, below, panel of cross-hatching in metopal panel and incised groove. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 69, no. 62, fig. 3, pl. 9h.
Sk63	Carinated	S05	D. rim: 16	Cross-hatching from rim, below, incised groove and cross-hatched triangle. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 69, no. 63, fig. 3, pl. 13d.

Sk64	Carinated	S05	D. rim: 16	Cross-hatching on rim. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 69, no. 64, fig. 3, pl. 13d.
Sk65	Carinated	S05	D. rim: 16	Cross-hatching on rim. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 69, no. 65, fig. 3, pl. 12b.
Sk66	Carinated	S05	D. rim: 18	Monochrome. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 69, no. 66, fig. 3.
Sk67	Carinated	S01 (Acropolis)	D. rim: 18	Small framed cross-hatched triangle in metopal panel on rim, below, incised groove. Interior: monochrome	PG	Coulson 1985: 69, no. 67, fig. 3, pl. 7b.
Sk68	Carinated	S05	D. rim: 13	Black band on rim, panel of cross-hatching to incised groove. Main decorative zone is framed by two incised grooves and consists of cross-hatched triangle in metopal panel with two vertical lines and panel of cross-hatching forming triglyph. Interior: monochrome	PG	Coulson 1985: 69, no. 68, fig. 3, pl. 12c.
Sk69	Carinated	S05	D. rim: 10	Monochrome. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 69, no. 69, fig. 3.
Sk70	Carinated	S05	D. rim: 10	Monochrome. Interior: monochrome.	PG	Coulson 1985: 69, no. 70, fig. 3.
Sk71	Carinated	S05	D. rim: 10	Cross-hatching at the rim, cross-hatched triangle in main decorative zone. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 69, no. 71, fig. 3, pl. 12c.
Sk72	Carinated	S05	D. rim: 11-12	Black band on rim, reserved band, followed by a main decorative zone of cross-hatched triangle in metopal panel, incised groove below. Interior: monochrome.	PG	Coulson 1985: 69, no. 72, fig. 3, pl. 12c.

Sk73	Carinated	S01 (Artemis Orthia)	D. rim: 12	Black band on rim, below, broad band of cross-hatching. Main decorative zone framed by two incised grooves, consists of framed cross-hatched triangles in metopal panels. Interior: monochrome, reserved band at inner rim.	PG	Desborough 1952, pl. 38.3; Coulson 1985: 69-70, no. 73, fig. 3, pl. 15b; Margreiter 1988, no. 13, pl. 3.
Sk74	Carinated	S01 (Artemis Orthia)	D. rim: 11	Black band on rim, below, broad band of cross-hatching with incised groove. In the decorative zone, cross-hatched triangle in metopal panel with four vertical lines of triglyph. Interior: monochrome, reserved band at inner rim.	PG	Desborough 1952, pl. 38.13; Coulson 1985: 70, no. 74, fig. 3, pl. 13g; Margreiter 1988, no. 15, pl. 3.
Sk75	Carinated	S01 (Acropolis)	D. rim: 11-12	Panel of cross-hatching from rim to incised groove. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 70, no. 75, fig. 3.
Sk76	Carinated	S05	D. rim: 12	Band of cross-hatching at rim. Main decorative between handles framed by two incised grooves. Decoration consists of framed cross-hatched triangle in metopal panel and triglyph formed by vertical lines. Possible second register of decoration. Interior: monochrome, reserved band at inner rim.	PG	Desborough 1952, pl. 38.1; Coulson 1985: 70, no. 76, fig. 3, pl. 15c; Margreiter 1988, no. 14, pl. 3.
Sk77	Carinated	S05	D. rim: 12	Cross-hatching at rim, main decorative zone, in between handles, is framed by two incised grooves. It consists of framed cross-hatched triangle in metopal panel. Interior: monochrome	PG	Coulson 1985: 70, no. 77, fig. 3, pl. 12b.

Sk78	Carinated	S05	D. rim: 14	Two registers of cross-hatching at rim, divided by incised grooves. Main decorative zone consists of cross-hatched triangles in a metopal panel. Interior: monochrome	PG	Coulson 1985: 70, no. 78, fig. 3, pl. 14c.
Sk79	Carinated	S05	D. rim: 14	Cross-hatching at rim, main decorative zone framed by two incised grooves, consists of chain of cross-hatched diamonds. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 70, no. 79, fig. 3, pl. 14c.
Sk80	Carinated	S05	D. rim: 12	Band of cross-hatching at rim, incised groove. Decorative zone with fragments of two vertical lines of triglyph of metopal panel. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 70, no. 80, fig. 3, pl. 13e; Margreiter 1988, no. 18, pl. 3.
Sk81	Carinated	S05	D. rim: 14	Cross-hatching at the rim, incised groove, below, cross-hatched triangles in main decorative zone, lower groove. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 70, no. 81, fig. 4, pl. 13d; Margreiter 1988, no. 20, pl. 3.
Sk82	Carinated	S05	D. rim: 9	Cross-hatching at the rim to incised groove, below, decorative zone of row of cross-hatched triangles, incised groove. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 70, no. 82, fig. 4, pl. 10a.
Sk83	Carinated	S05	D. rim: 12	Black band on rim, followed by wavy line. Main decorative zone of cross-hatched triangle in metopal panel. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 70, no. 83, fig. 4, pl. 14c.

Sk84	Carinated	S05	D. rim: 12	Black band at rim, followed by reserved band and an incised groove. Decorative zone with three vertical lines forming triglyph. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 70, no. 84, fig. 4, pl. 10a.
Sk85	Carinated	S05	D. rim: 11	Black band at rim, reserved band and incised groove. Decorative zone of framed cross-hatched triangles in metopal panel with two vertical lines forming triglyph. Below, incised groove. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 70, no. 85, fig. 4, pl. 13d.
Sk86	Carinated	S05	D. rim: 12	Black band on rim, reserved band, followed by second black band. Decorative zone of undecorated (?) metopal panels with triglyph. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 70, no. 86, fig. 4, pl. 9h.
Sk87	Carinated	S05	D. rim: 9	Black band on rim, reserved band, followed by second black band. Decorative zone has cross-hatched triangle in metopal panel. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 71, no. 87, fig. 4, pl. 9i.
Sk88	Carinated	S05	D. rim: 9	Monochrome. Interior: monochrome.	PG	Coulson 1985: 71, no. 88, fig. 4.

Sk152	Flaring	S05	D. rim: 16	Reserved band at the rim. Main decorative zone of framed cross-hatched triangle in metopal panel, below, incised groove. Interior: monochrome.	PG	Coulson 1985: 72, no. 137, fig. 5, pl. 7d.
Sk153	Flaring	S05	D. rim: 12-14	Monochrome. Interior: monochrome.	PG	Coulson 1985: 72, no. 138, fig. 5.
Sk154	Flaring	S05	D. rim: 18	Monochrome. Interior: monochrome.	PG	Coulson 1985: 72, no. 139, fig. 5.
Sk155	Flaring	S01 (Artemis Orthia)	D. rim: 18	Banding on rim. Main decorative zone of piled (?) triangle in metopal panel. Below, two incised grooves. Interior: monochrome.	PG	Coulson 1985: 72, no. 140, fig. 5, pl. 14e.
Sk156	Flaring	S01 (Artemis Orthia)	D. rim: 26	Black band at rim, main decorative zone of concentric circles in metopal panel with two verticals forming triglyph. Fragment of panel of cross-hatching, below, incised groove. Interior: monochrome.	PG	Coulson 1985: 72, no. 141, fig. 5, pl. 13g; Margreiter 1988, no. 33, pl. 3.
Sk157	Flaring	S01 (Artemis Orthia)	D. rim: 16	Reserved rim, followed by black band. Main decorative zone of metopal panel with either a framed cross-hatched triangle or piled triangles. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 72, no. 142, fig. 5, pl. 7a.

Sk158	Flaring	S01 (Acropolis)	D. rim: 16	Reserved rim with black band bellow. Main decorative zone of metopal panels with two vertical lines and panel of cross-hatching forming triglyph. Interior: monochrome.	PG	Coulson 1985: 72-3, no. 143, fig. 5, pl. 7b.
Sk159	Flaring	S05	D. rim: 18	Banding on rim. Below, main decorative zone of cross-hatched triangle in metopal panel. Interior: monochrome.	PG	Coulson 1985: 73, no. 144, fig. 5, pl. 13f.
Sk160	Flaring	S05	D. rim: 22	Banding on rim. Decorative zone of cross-hatching in metopal panel with four vertical lines forming triglyph. Interior: monochrome.	PG	Coulson 1985: 73, no. 145, fig. 5, pl. 10b.
Sk161	Flaring	S05	D. rim: 20	Black band at rim, then reserved band, followed incised groove. Decorative zone of framed cross-hatched triangle in metopal panel. Interior: monochrome.	PG	Coulson 1985: 73, no. 146, fig. 5, pl. 10b.
Sk162	Flaring	S05	D. rim: 16	Banding on rim. Decorative zone of row of linked cross-hatched triangles, below, incised groove. Interior: monochrome.	PG	Coulson 1985: 73, no. 147, fig. 5, pl. 12d.
Sk163	Flaring	S05	D. rim: 22	Black band at rim, below, decorative zone of broad band of cross-hatching. Incised groove below. Interior: monochrome.	PG	Coulson 1985: 73, no. 148, fig. 5, pl. 10b.
Sk164	Flaring	S05	D. rim: 18	Black band at rim, below, decorative zone of fragmented framed cross-hatched triangle in metopal panel. Followed by incised groove. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 73, no. 149, fig. 5, pl. 15c.
Sk165	Flaring	S05	D. rim: 16	Banding on rim. Decorative zone of fragment of cross-hatched triangle in metopal panel. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 73, no. 150, fig. 5, pl. 12d.

Sk166	Flaring	S05	D. rim: 16	Reserved band at rim, black band and decorative zone of framed cross-hatched triangle in metopal panel. Below, incised groove. Interior: monochrome.	PG	Coulson 1985: 73, no. 151, fig. 5, pl. 13f.
Sk167	Flaring	S05	D. rim: 16	Black band at rim. Decorative zone of fragment of cross-hatched triangle in metopal panel. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 73, no. 152, fig. 5, pl. 10c.
Sk168	Flaring	S05	D. rim: 22	Black band at rim, below, fragment of broad band of cross-hatching. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 73, no. 153, fig. 5, pl. 13f.
Sk169	Flaring	S01 (Artemis Orthia)	D. rim: 20	Banding on rim. Main decorative zone of piled (?) triangles in metopal panel. Black coating below. Interior: monochrome.	PG	Coulson 1985: 73, no. 154, fig. 5, pl. 7a.
Sk170	Flaring	S05	D. rim: 18	Black band at rim. Below, main decorative zone of fragment of cross-hatched triangle in metopal panel and fragment of cross-hatching. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 73, no. 155, fig. 6, pl. 13e.
Sk171	Flaring	S05	D. rim: 16	Black band at rim. Main decorative zone of framed cross-hatched triangle in metopal panel. Below, incised groove and reserved band. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 73, no. 156, fig. 6, pl. 12d.

Sk172	Flaring	S05	D. rim: 14	Black band at rim, followed by band of cross-hatching and incised groove. Main decorative zone of fragment of cross-hatched triangle in metopal panel. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 73, no. 157, fig. 6, pl. 12c.
Sk173	Flaring	S05	D. rim: 14	Black band at rim. Decorative zone of cross-hatched triangles in metopal panels. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 73-74, no. 158, fig. 6, pl. 14d.
Sk174	Flaring	S05	D. rim: 14	Black band at rim. Decorative zone of fragment of framed cross-hatched triangle. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 74, no. 159, fig. 6, pl. 13d.
Sk175	Flaring	S05	D. rim: 14	Monochrome with a reserved band. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 74, no. 160, fig. 6, pl. 10a.
Sk176	Flaring	S05	D. rim: 16	Black band at rim, decorative zone of row of linked piled triangles. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 74, no. 161, fig. 6, pl. 10c.
Sk177	Flaring	S05	D. rim: 12	Banding on rim. Decorative zone of fragment of cross-hatched triangle. Interior: monochrome.	PG	Coulson 1985: 74, no. 162, fig. 6, pl. 10c.
Sk178	Flaring	S05	D. rim: 12	Banding on rim. Below, five verticals of triglyph of metopal panel. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 74, no. 163, fig. 6, pl. 13f.
Sk179	Flaring	S05	D. rim: 16	Banding on rim. Decorative zone of cross-hatched triangle in metopal panel. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 74, no. 164, fig. 6, pl. 12d.

Sk180	Flaring	S05	D. rim: 12	Banding on rim. Decorative zone of triglyph in metopal panel. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 74, no. 165, fig. 6, pl. 12c.
Sk181	Flaring	S05	D. rim: 18	Black band at rim. Decorative zone of cross-hatching in metopal panel. Below, incised groove. Interior: monochrome, reserved band at inner rim.	PG	Coulson 1985: 74, no. 166, fig. 6, pl. 13f.
Sk182	Flaring	S05	D. rim: 15	Banding on rim. Decorative zone with fragment of cross-hatched (?) triangle. Interior: monochrome.	PG	Coulson 1985: 74, no. 167, fig. 6, pl. 12b.
Sk183	Flaring	S05	D. rim: 14	Monochrome. Interior: monochrome.	PG	Coulson 1985: 74, no. 168, fig. 6.
Sk184	Flaring	S05	D. rim: 16	Monochrome. Interior: monochrome.	PG	Coulson 1985: 74, no. 169, fig. 6.
Sk185	Flaring	S01 (Artemis Orthia)	D. rim: 12	Black band at rim. Decorative zone with fragment of cross-hatched triangle in metopal panel. Interior: monochrome.	PG	Coulson 1985: 74, no. 170, fig. 6, pl. 6i.
Sk186	Flaring	S05	D. rim: 16	Monochrome. Interior: monochrome.	PG	Coulson 1985: 74, no. 171, fig. 6, pl. 10d.
Sk187	Flaring	S05	D. rim: 16	Banding on rim. Decorative zone of cross-hatching in metopal panel. Possible second register of decoration. Interior: monochrome.	PG	Coulson 1985: 74, no. 172, fig. 6, pl. 14d.
Sk188	Flaring	S05	D. rim: 16	Monochrome. Interior: monochrome.	PG	Coulson 1985: 74, no. 173, fig. 6.
Sk189	Flaring	S05	D. rim: 16	Banding on rim. Decorative zone with linked piled triangles. Interior: monochrome.	PG	Coulson 1985: 74, no. 174, fig. 6, pl. 12b.

Sk190	Flaring	S01 (Athena Chalkioikos)	D. rim: 14	Black band on the rim. Below, decorative zone with fragment of linked piled or cross-hatched triangles. Interior: monochrome.	PG	Coulson 1985: 74, no. 175, fig. 6, pl. 7e.
Sk191	Flaring	S05	-	Banding on rim. Cross-hatched triangles and vertical lines and cross-hatching forming triglyph on decorative zone and black coating on lower body.	PG	Vlachou 2018: 104, fig. 4.5A-B.
Sk192	Unknown	S05	-	Body sherd: cross-hatching in metopal panel. Interior: monochrome.	PG	Coulson 1985: 75, no. 185, fig. 7.
