

Supplementary Figure S5. Maximally adjusted restricted cubic spline regression models for the association between alcohol intake and **A)** intraocular pressure, **B)** retinal nerve fiber layer thickness, **C)** ganglion cell–inner plexiform layer thickness, and **D)** glaucoma in all participants (excluding former drinkers). Vertical lines represent current UK (112g/week) and US (females 98g/week; males 196g/week) recommended alcohol guidelines.
