

This survey is part of a study led by researchers from University of Oxford to understand if and how medical researchers use data collected by others. Even if you do not use data collected by others, your insights are useful for this study. Your responses are anonymous. The survey takes **3 -7** minutes to complete.

What is the purpose of the research?

It is increasingly becoming the norm to share data from clinical research studies. We seek to understand if and how shared datasets are reused, what challenges exist in accessing and reusing the data and what impact data reuse has had on scientific research and general public health.

What are the possible benefits of this research?

Data from this study will help to define what measures should be implemented to increase effective secondary data use. We anticipate that increased reuse of data will result in improved quality and transparency in science, improved public health and patient outcomes, and better return on investment in research.

Study team and information

The study is led by researchers from University of Oxford and Mahidol Oxford Tropical Medicine Research Unit with collaborators in UK, Kenya and Vietnam. The study has been approved by the Oxford Tropical Research Ethics Committee (OxTREC) reference number: 568-20.

Data protection

In the course of completing the survey, you will have provided information about yourself ('personal data'). Data protection regulation requires that we state the legal basis for processing information about you. In the case of research, this is 'a task in the public interest.' The University of Oxford is the data controller and is responsible for looking after your information and using it in accordance with the General Data Protection Regulation and associated data protection legislation. Your data will be held securely in accordance with the University's policies and procedures. Further information is available on the University's Information Security [website](#). Information on your rights in relation to your personal data are explained [here](#).

The findings from this research project will be disseminated through research reports, publications/articles and presentations. We are processing your data for these purposes only because you have given us your consent to do so, by ticking the appropriate box. Your responses will be anonymous, as the survey does not collect your name, email address or IP address. Because of this, we will not be able to withdraw your responses retrospectively, after you have submitted them. If you exit the survey before submitting your responses, your data will not be stored.

Contact

If you wish to raise any queries or concerns about our use of your data, please contact us at reuse@tropmedres.ac or on Telephone +66 02 203 6333 Ext 8302

If you wish to contact someone independent of the study team, you can email the Oxford Tropical Research Ethics Committee (OxTREC) by email: oxtrec@admin.ox.ac.uk.

I agree to take part in the survey. I understand that my participation is voluntary and that I am free to withdraw at any time (please tick).

Have you used clinical research data that has been shared by other researchers?

Yes

No

1) What types of data, shared by other researchers, have you used? *(tick all that apply)*

- Clinical trials data
- Cross-sectional health surveys
- Observational cohort data
- Surveillance data
- Administrative data
- Patient / Disease registries
- Pharmacology data
- Molecular biology data
- Omics data (Genomics, Transcriptomics, Proteomics, Epigenomics, Metabolomics)
- Social science data
- Health economics data
- Qualitative data
- Other

You selected Qualitative or 'Other' data. Please specify what kind of research generated the data

2) How did you access the datasets? *(tick all that apply)*

- Request to data collector/custodian
- Download from a public website/repository
- Request through a Data Access Committee
- Other

You selected Other, please specify:

3) How many times have you requested data in the last 5 years ? *(if you cannot remember the exact number of requests, you may provide an estimate)*

In 2017

In 2018

In 2019

In 2020

In 2021

4) What did you use the data for? *(Tick all that apply)*

- To plan and design a new study (e.g. determining feasibility of new research)
- Pooled or meta-analyses
- Mathematical modeling
- Training artificial intelligence algorithms
- Reanalysis to verify research findings
- Secondary analysis (including generating/testing new hypotheses)
- Baseline data for new study
- Teaching
- Literature review
- Application for registration of a drug/medical device
- Health-related policy/guideline development
- Other

You selected Other, please specify:

5) What outputs were generated from the data? *(Select as many categories as appropriate)*

- Publication
- Presentation (e.g. conference talk, poster, seminar, webinar)
- Thesis or Dissertation
- Report
- Book chapter
- Validation of mathematical model
- Training Artificial Intelligence algorithm
- Validation of software code

- Blog post
- Social media post
- Other
- No outputs were generated from use of this data

You selected Other, please specify:

6) What were the outcomes of using the data ? *(tick all the apply)*

- Validated or verified results from existing publication
- Correction or retraction of an existing publication
- MSc or PhD obtained
- New job created, e.g. internship, new analyst hired
- Career progression for me or my peers
- Increased citations and visibility for me/my institution
- Studies using secondary data as baseline were launched
- Design of a new study was influenced by results of the analysis
- New/increased collaboration with other researchers
- Invited to speak/contribute in expert forum
- Mention by authoritative body, e.g. Government body, WHO
- Findings included in health policy/treatment guidelines
- Registration of new drug or medical device
- Funding for my research or my institution
- Financial benefit from registration of drug or medical device

- Personal financial benefit, e.g. consultancy payment for secondary analysis
- Other
- None
