

Digital Preservation at Oxford and Cambridge

A collaborative research project to evaluate and provide sustainable recommendations for our digital preservation programmes

Come Join the DPOC Team!

Posted on **14 October, 2016** by **Sarah**

The Bodleian Libraries, University of Oxford are looking for the third Polonsky Fellow (Technical Officer/Research Software Engineer) to join the team!

As a Technical Officer/Research Software Engineer at Oxford you will undertake research and training to build upon your expertise in the technical issues surrounding digital preservation and your awareness of the tools, systems and projects that seek to address these issues. You will also develop and/or implement digital preservation applications and services within the Bodleian Libraries, contribute to the development of a business case and sustainability plan for digital preservation operations, disseminate the key findings of your work to at least one conference and submit one journal article per year based on your work in collaboration with colleagues.

If you're interested in joining this project and want more information, apply [here](#).

*Remember you get to work with these great [team members](#) at Oxford and Cambridge!
