flyer or at www.uco.ac.uk/NeuOst

WHAT'S THIS ABOUT?

If you live with painful diabetic neuropathy or diabetes-related foot pain, we invite you to be part of our research.

We're testing NeuOst, a new drug-free therapy, to find a better solution for your pain. NeuOst involves manual therapy, exercises, and strategies to help you cope better with pain. This therapy was developed with leading experts and patients like you!

In this research, we want to find out how patients like this new treatment and if a larger trial is possible.

WHO CAN GET INVOLVED?

We are looking for people with diabetes and foot or nerve pains.

Contact us now if you think you qualify!

WHAT WOULD I BE DOING?

Participate in a 16-week study at the Health Sciences University, UCO School of Osteopathy clinic in Southwark Bridge Road, SE1 0BQ.

If you are assigned to one of the treatment groups, trained osteopaths will administer treatments and look after you during up to 5 visits in our clinic. You will then have 3 phone calls to answer questions about your symptoms and your study experience.

Your input matters, and you'll be compensated for your time and expenses.
