The radiocarbon dates

Eleven radiocarbon dates were obtained from excavated material, three from wood and eight from human bone. The three from wood were from the three stakes excavated in the central area of Trench MF9. Two from bone were the Roman skeletons in the top of the eastern part of the arena bank in trench MF1. The other six were from Iron Age skeletons, three from contexts within Trench MFP4, one from Trench MFP6, one from Trench MF36 and the other from a skeleton excavated in the MFNA area by Harding in the 1960s.

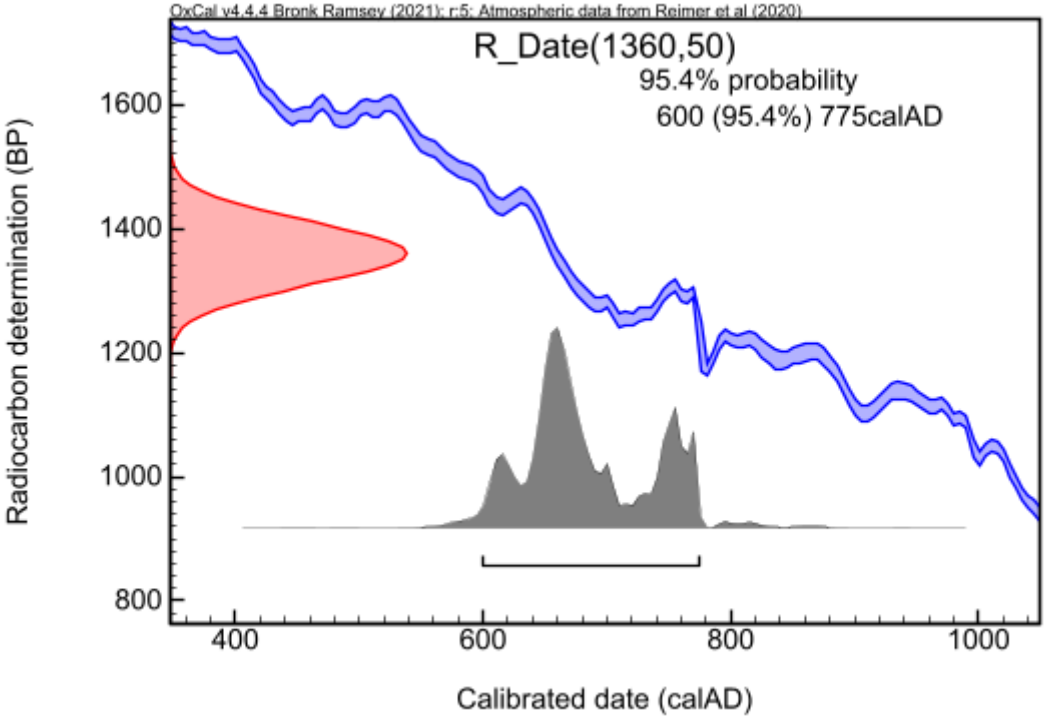

Beta-182615, 1910+/-60, wood (roundwood), 1-245 cal AD, (stake 9350)

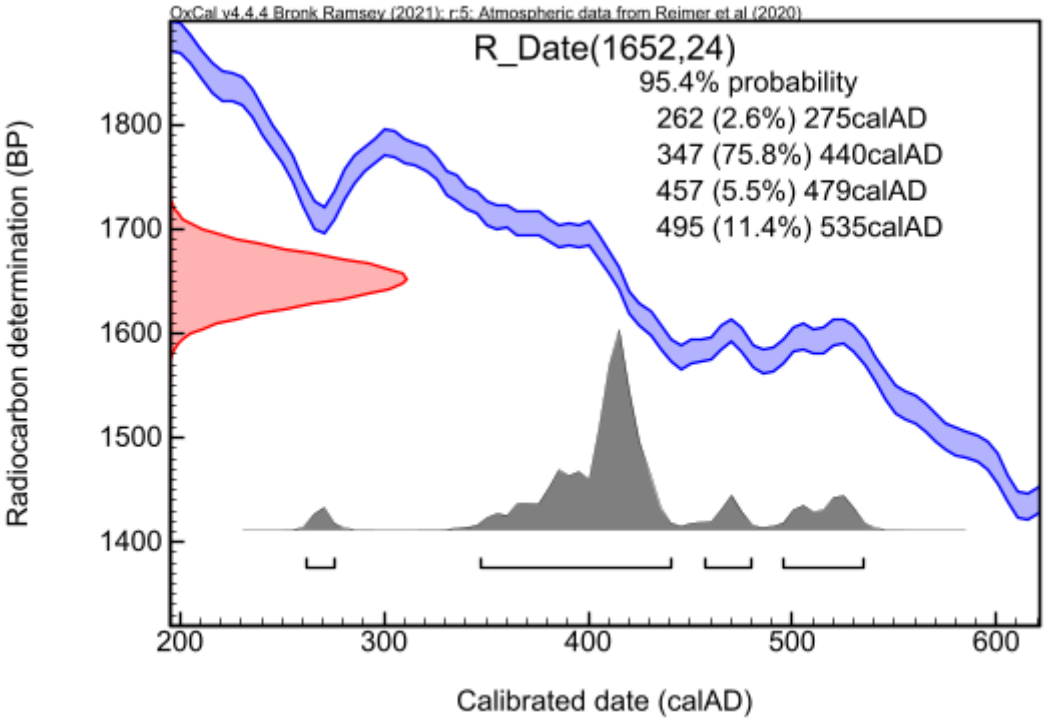

Beta-228365, 1860+/-50, wood (roundwood), 61-257 cal AD, (stake 9480)

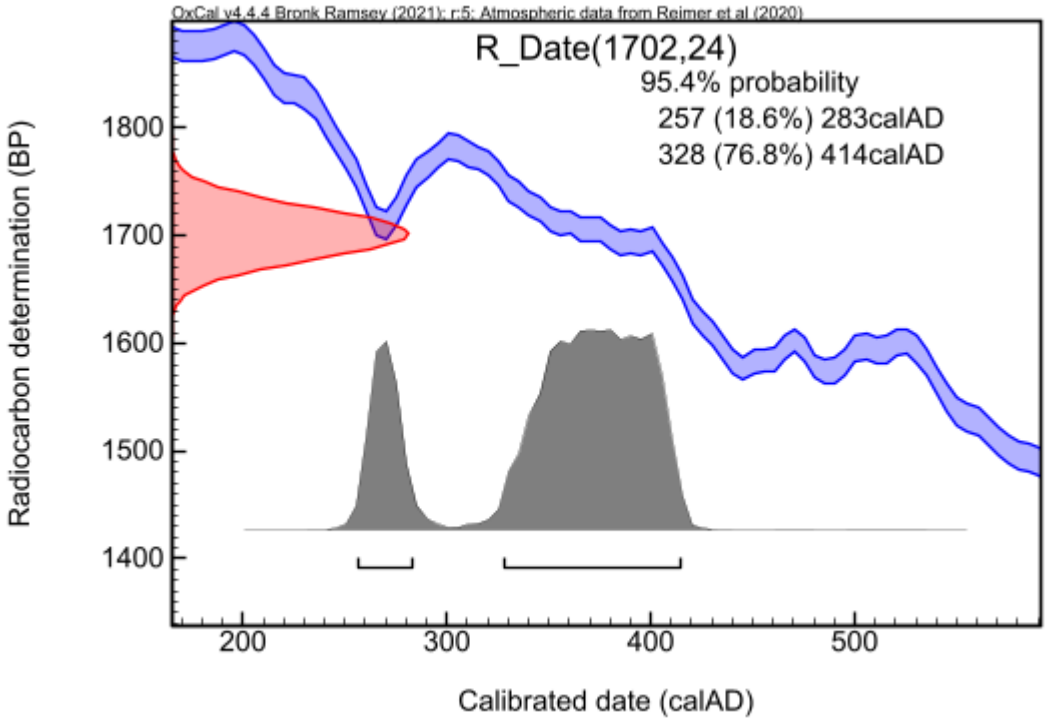

Beta-228366, 1360+/- 50, wood (roundwood), 600-775 cal AD, (stake 9507)

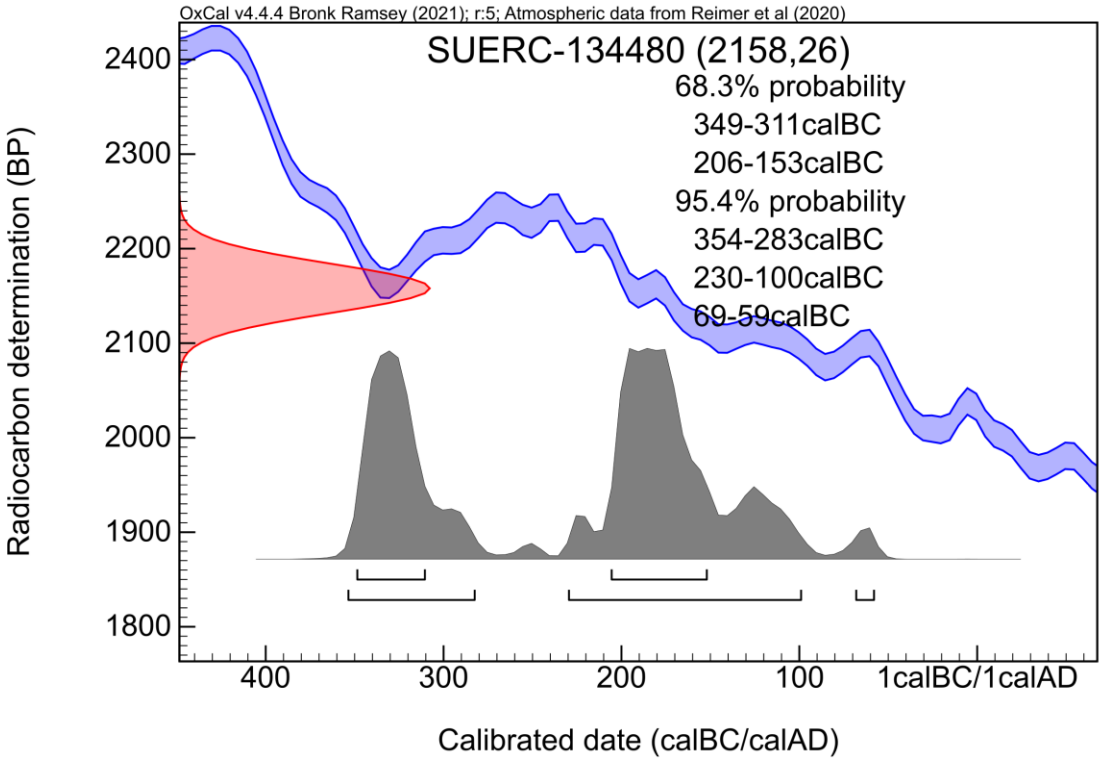

OxA-17654, 1652+/- 24, bone, 347-440 cal AD, (context 1347, SK8)

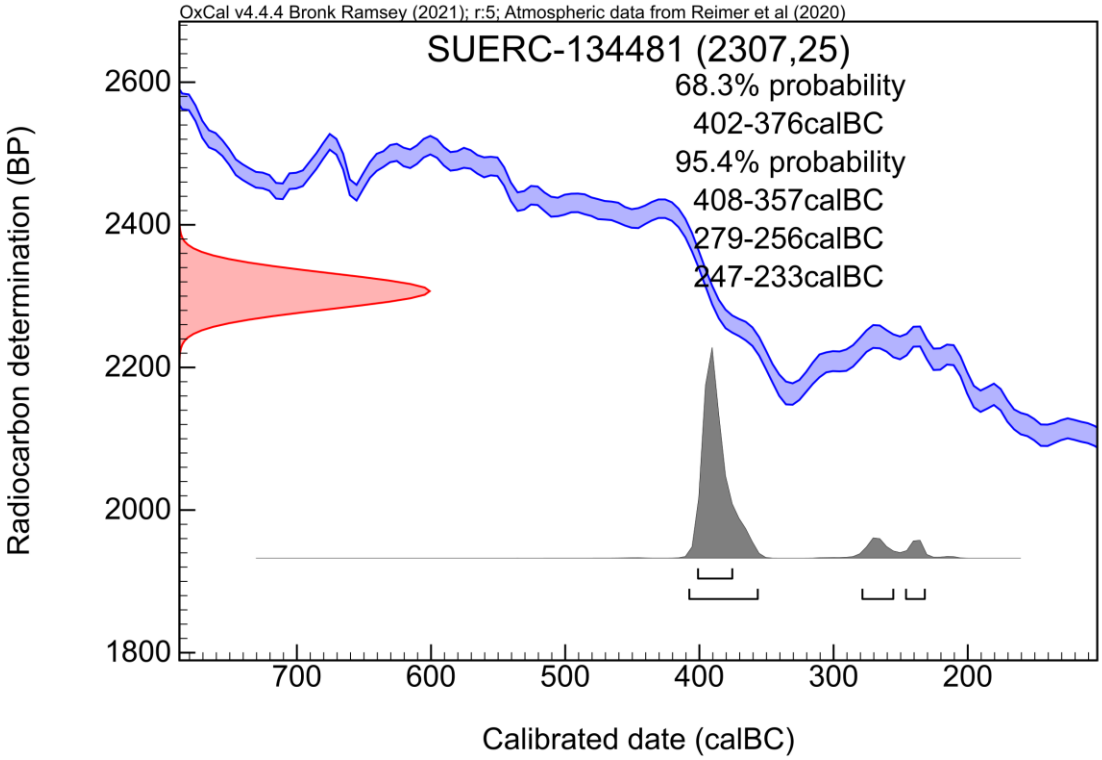

OxA-17655, 1702+/-24, bone, 328-414 cal AD, (context 1348, SK13)

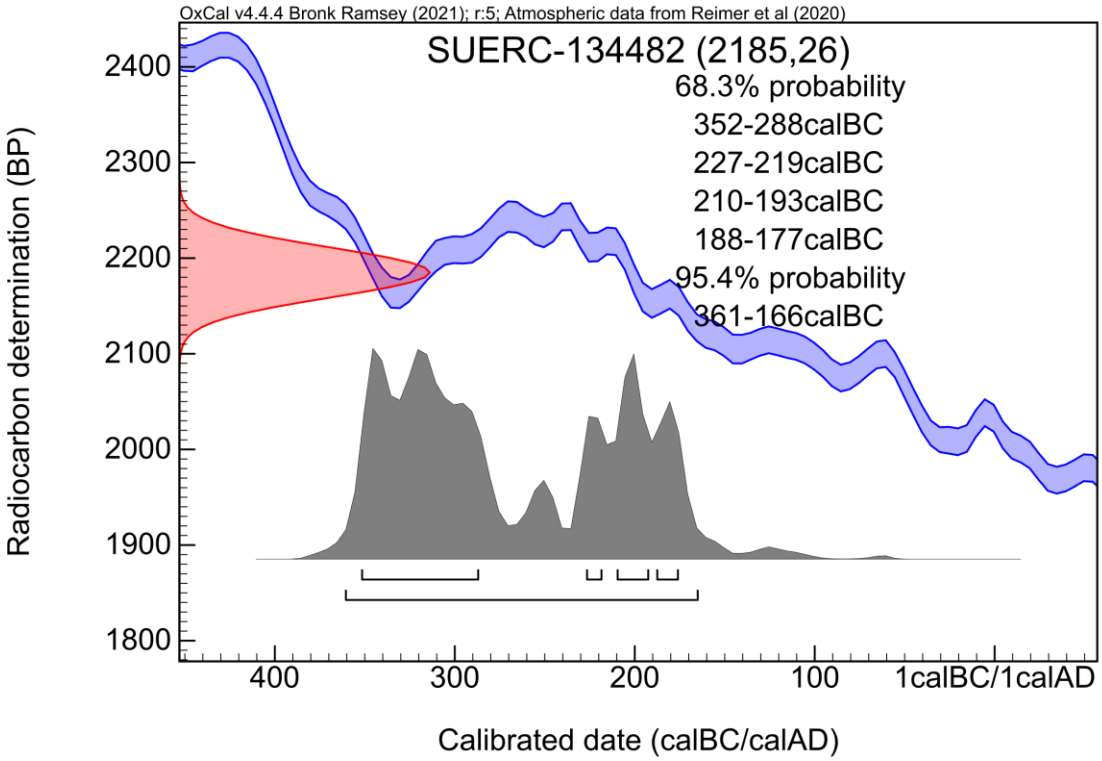

SUERC-134480, 2158+/-26, bone, 354-283 cal BC (Harding's 1960s)

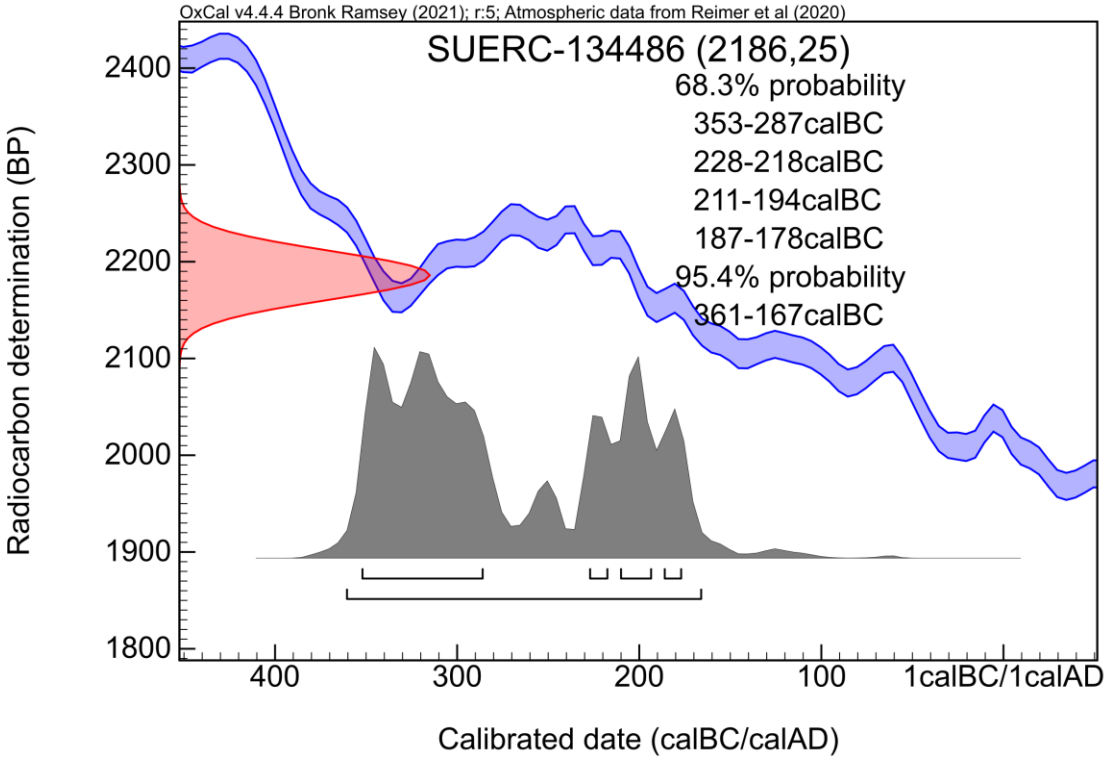

SUERC-134481, 2307+/-25, bone, 408-357 cal BC (context 36103, SK19)

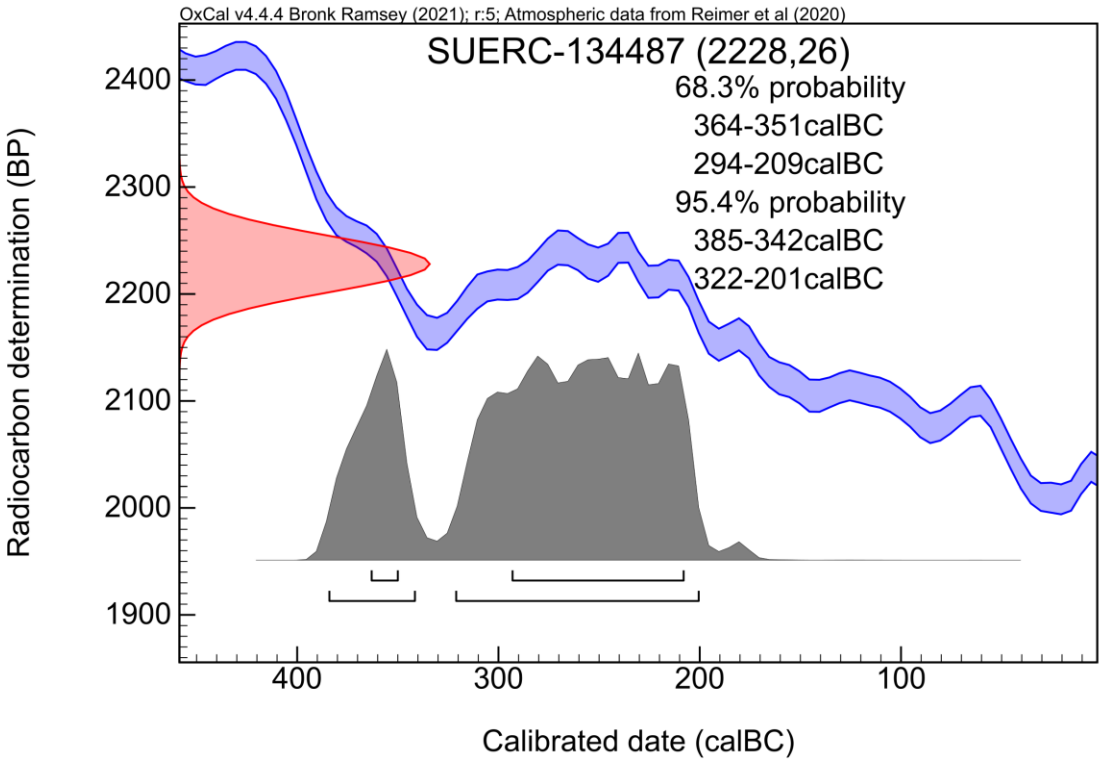

SUERC-134482, 2185+/-26, bone, 361-166 cal BC (context 4079, SK21)

SUERC-134486, 2186+/-25, bone, 361-167 cal BC (context 6026, SK24)

SUERC-134487, 2228+/-26, bone, 385-201 cal BC (context 4224, SK25)

SUERC-134488, 2288+/-26, bone, 403-211 cal BC (context 4241, SK26)
