

Supplementary Material 1. Supplemental descriptive statistics for the fifteen background covariates/potential confounds featuring in this paper

Fifteen background covariates measured at mean child age 14 months were included in analyses featured in this paper. The rationale for their inclusion is shared with the rationale for including the measures that recorded families' use of Children's Centres: they are measures identified by the [anonymised] Impact Report (Anonymous, 2015a) as confounding factors when identifying the impact of Children's Centres on preschoolers' problem behaviour and/or their preschool home learning environment. Table Ap1 presents descriptive statistics for these background covariates/potential confounds. The inclusion of these measures accounted for background differences in the problem behaviour of preschoolers that were linked to differences between children, "Household mothers" (biological, adopted, step, or foster), families, and neighbourhoods. Two of the fifteen measures (mother physical health; household financial disadvantage) were the product of statistical cluster analysis procedures and both of these analyses and results are fully documented in the [anonymised] Impact Report (Anonymous, 2015a).

Table Ap1. Descriptive statistics for the fifteen background covariates/potential confounds featuring in this paper (n=2,315 listwise deleted cases)

Measure	Category	n	Min./ Max.	% or Mean±SD
1. Child: Gender (n=2568)	Female	1284		50.00
	Male	1284		50.00
2. Child: Number of siblings <18 years at baseline (n=2568)	Singleton	1239		48.20
	1-2 Siblings	1180		46.00
	3+ Siblings	149		5.80
3. Parenting: Parenting Stress Index Score at baseline: Parent-Child Dysfunctional Interaction		2505	-6.01/ 37.99	- 0.32±5.58
4. Parenting: Parenting Stress Index Score at baseline: Difficult Child		2484	-10.01/ 35.99	- 0.12±6.55
5. Parenting: Confusion, Hubbub and Order Scale (in the home) Score at baseline		2564	-4.21/ 10.79	- 0.14±2.29
6. Household mother: age at baseline		2556	-13.00/ 29.00	1.42±5.56
7. Household mother: highest level of academic qualification obtained at baseline (n=2558)	No qualifications*	125		4.90
	GCSE Grades D-F/ NVQ1/ BTEC1	141		5.50
	GCSE Grades A*-C/ NVQ2/ BTEC2	551		21.50
	A-Level/ NVQ3/ BTEC3	485		18.90
	Cert. of HE/ NVQ4/ BTEC4	174		6.80
	Found. Deg./ NVQ4*/ BTEC5	94		3.70
	Hons Deg./ NVQ4*/ BTEC 6 or higher	904		35.20
	Other qualifications	84		3.30
8. Household mother: Physical health at baseline (from cluster analysis; n=2516)	Healthy*	1579		61.50
	Unhealthy Eater	315		12.30
	Unhealthy Lifestyle (smoking, drinking, drug-taking)	374		14.60
	Long-term Ill	248		9.70
9. Household mother: Mental health at baseline via General Health Questionnaire		2456	-10.56/ 25.44	- 0.11±5.29
10. Household mother: Mother opinion of relationship quality (from cluster analysis; n=2562)	Not in a relationship*	430		16.8
	Better relationship quality	706		27.6
	Poorer relationship quality	1426		55.7
11. Household: financial disadvantage at baseline (from cluster analysis; n=2561)	Less financially disadvantaged*	839		32.70
	Average level of disadvantage	1218		47.40
	More financially disadvantaged	504		19.60

SSCCS, HOMES, & PRESCHOOLER BEHAVIOURAL DISORDERS

12. Household:	Never Married: Couple	629		24.50
Parental cohabitation and marital status at baseline (n=2561)	Never Married: Single Mother	302		11.80
	Married: Couple*	1507		58.70
	Separated/divorced: Couple	40		1.60
	Separated/divorced: Single mother	83		3.20
13. Household:	no	1923		74.90
Newly born child in household since baseline? (n=2568)	yes	645		25.10
14. Household:	None*	1407		
Number of stressful life events since baseline (n=2568)	One	828		
	Two	277		
	Three or more	56		
15. Neighbourhood: Income Deprivation Affecting Children Index (IDACI) at baseline		2541	-0.29/ 0.48	- 0.02±0.17

*Notes: SD=standard deviation; “Baseline” refers to the first wave of fieldwork conducted in 2012 with families who were registered use of one of 121 sampled Children’s Centres and who had children aged 9-18 months at the time (mean child age 14 months); “Household mother” referring to the presence of a self-identified biological, step, foster, or adopted mother; “stressful life events” include household occurrence of bereavements, divorce, incarceration in prison, and/or job loss (see Anonymous, 2015a); *=reference category in saturated Structural Equation Model*

Supplementary Material 2. Missing data across all variables

Table Ap2. Missing data across all variables

Domain	Measure	n	missing	
			n	%
Families' use of Children's Centres between mean child ages 14 to 38 months	1. Use of a registered Children's Centre: Total Period used (in months; breaks possible; z-scored before analysis)	2568	0	0.00%
	2. Use of a registered Children's Centre: Distinct Patterns evident from Cluster Analysis	2568	0	0.00%

	Household: Newly born child in household (at mean child age 28 months and since the child was mean age 14 months)?	2568	0	0.00%
	Household: Number of stressful life events at mean child age 38 months (since mean child age 14 months)	2568	0	0.00%
<i>...relating to neighbourhoods</i>	Neighbourhood: Income Deprivation Affecting Children Index (IDACI) at baseline	2568	0	0.00%

Supplementary Material 3. Full results from the nine saturated Structural Equation

Models featured in this paper

The full results (unstandardised regression coefficients, covariances, and proportions of variances explained in statistically dependent measures) from the nine saturated Structural Equation Models that returned the results of this paper are presented in Tables Ap3 to Ap11. Within these, “ON” is shorthand for ‘statistically dependent upon’ and, “WITH” is shorthand for ‘statistically covarying with’. The contents of Table Ap2 permits these nine tables to be understood by labelling the variables names by the measured concept. The only exception to this are the “USECAT” measures that feature in Tables Ap3 to Ap11. These refer to the dummy measures that recorded the categories within the eight nominal measures of families’ use of Children’s Centres between 2012 and 2014 (described within Table 1 of the main text).
