

Description of Additional Supplementary Files

Supplementary Data 1: Characteristics of the individuals investigated in this study, highlighting sex, age range, disease severity, sampling timepoints and MHC class II alleles. M, male; F, female.

Supplementary Data 2: Public TCR α/β clonotypes in our scRNA-seq data. Clonotypes are defined as CDR3 amino acid sequence + V gene usage, with public clonotypes found in >1 unrelated individuals. CDR3, complementarity determining region 3; aa, amino acid; V gene, variable gene; J gene, joining gene.
