

Scatter plot showing the relationship between Sample (Y-axis, 1 to 10) and interp_age (years_BP) (X-axis, 16000 to 10000). The plot displays data points for each sample, illustrating the distribution of calibrated dates. Samples 1-5 show a general trend of decreasing age from left to right, while samples 6-10 show a general trend of increasing age from left to right, with some scatter.
