

Additional file 2: Inclusion and exclusion criteria

This table summarises the inclusion and exclusion criteria that we used for the review of identified resources.

| | Inclusion considerations |
|-------------------|---|
| Concept | The resource must develop a list of high-consequence infectious pathogens , other forms of research prioritisation will be excluded (i.e. specific research domains within one disease). |
| List of pathogens | At least one of the pathogens on the list must belong to the World Health Organization list of “ <i>priority pathogens with a high potential to cause a PHEIC [Public Health Emergency of International Concern]</i> ” published in 2024 (Supplemental appendix 1). |
| Methodology | It is not compulsory that the methodology to establish the list is reported. |
| Timeframe | Resources published between the 1 st January 2018 and the 26 th of September 2024. |
| Language | No restrictions. |
| Type of documents | Only academic papers or grey literature documents will be included in the scoping review. |
